Deodorant has been linked to breast cancer in the media, but there has not been any reliable data found that deodorant causes cancer.

dba23c63a9 == Overview == dba23c63a9 Haircut fetishism is a related paraphilia in which a person is aroused by experiencing, performing, or observing the act of cutting or shaving head hair. The fetish may also extend to specific short haircut styles or to objects associated with hair cutting, such as electric clippers.

dba23c63a9 The first commercial deodorant was introduced and patented in the late nineteenth century by Edna Murphey, an inventor in Philadelphia, Pennsylvania. The product was briefly withdrawn from the market in the US. The modern formulation of the antiperspirant was patented by Jules Montenier on January 28, 1941. This formulation was first found in "Stopette" deodorant spray, which Time magazine called "the best-selling deodorant of the early 1950s."

dba23c63a9 In 1858, Lola Montez wrote about several "unfortunate" women she knew who had attempted to remove "unfeminine" hair on the upper lip, neck, arms and chin using various methods that had...

dba23c63a9 Bald fetishism is a related paraphilia regarding sexual attraction to full or partial baldness resulting either from the depilation of the scalp or various forms of alopecia; or attraction to those possessing these traits.

Hair fetishism Arousal may occur from seeing or touching hair, whether head hair or body hair. Fur fetishism Hair theft Hairstyle Paraphilia Bear (gay culture) Armpit fetishism Stanley E. Head-hair arousal may come from seeing or touching very long or short hair, certain colors of hair, wet hair, or particular hairstyles. Althof (14 January Hair fetishism, also known as hair partialism and trichophilia, is a sexual fetish in which a person finds hair – most commonly head hair – to be particularly erotic and sexually arousing. on female models having their heads shaved dba23c63a9

Deodorant A subclass of deodorants called antiperspirants prevents sweating itself, typically by blocking sweat glands. There are two types of deodorant; aerosol (spray) and stick. Antiperspirants are used on a wider range of body parts at any place where sweat would

## How To Shave Armpits

be inconvenient or unsafe. A deodorant is a substance applied to the body to prevent or mask body odor caused by bacterial breakdown of perspiration, such as that in the armpits, groin, or feet. Other types of deodorant allow sweating but prevent bacterial action on sweat. substance applied to the body to prevent or mask body odor caused by bacterial breakdown of perspiration, such as that in the armpits, groin, or feet dba23c63a9

History of removal of leg and underarm hair in the United States The removal of armpit and leg hair by American women became a new practice in the early 20th century due to a confluence of multiple factors. Americans wore thick dark-colored At the outset of the United States, leg and underarm hair removal was not a common practice for women. In fact, body hair had been viewed as a boon by Caucasian people, and therefore removal was not an imported practice from European settlers into the United States. Hemlines rose on skirts and dresses from 1910 to 1927. extended the hairless ideal of the armpits to the legs as well dba23c63a9

Both men and women have visible body hair on the head, eyebrows, eyelashes, armpits, genital area, arms, and legs. Men and some women may also have thicker hair growth on their face, abdomen, back, buttocks, anus, areola, chest, nostrils, and ears. Hair does not generally grow on the lips, back of the ear, the underside of the hands or feet, or on certain areas of the genitalia. dba23c63a9 Although fine vellus hair is present in the area during childhood, pubic hair is considered to be the heavier, longer, coarser hair that develops during puberty as an effect of rising levels of hormones: androgens in males and estrogens in females. dba23c63a9 == By gender == dba23c63a9 == Premise == dba23c63a9 One cultural change was the definition of femininity. In the Victorian era, it was based on moral character. This shifted in the early 1920s when the new feminine idea became based on the body. Women revealed more of their bodies in 1920s clothing; and at the same time they began using bras, makeup, and dieting. Author of The Body Project, J. Brumberg, summarizes, "The body itself became the fashion in the 1920s." In this context, hair removal was promoted as a sex norm requirement for women, to be attained through consumption and use of hair removal products. dba23c63a9 The books examine, investigate, and explain common, yet puzzling phenomena. Examples include: "Why do your eyes hurt when you are tired?", "Why do judges wear black robes?", and "Why do you rarely see purple Christmas lights?", among many others. The word "imponderable" is used to describe such mysteries of everyday life. The books are organized in a FAQ format. dba23c63a9 == History == dba23c63a9 The term "depilation" is derived from the Medieval Latin "depilatio," which in turn is derived from the Latin "depilare," a

Armpit fetishism The natural body smell can be Armpit fetishism (also known as maschalagnia or axillism (also spelled axilism)) is a type of partialism in which a person is sexually attracted to armpits, which may lead to armpit intercourse (sexual activity with one or both armpits). person is sexually attracted to armpits, which may lead to armpit intercourse (sexual activity with one or both armpits) dba23c63a9

Hair is a common feature of the human body, exhibiting considerable variation in thickness and length across different populations. Hair becomes more visible during and after puberty. Additionally, men typically exhibit thicker and more conspicuous body hair than women. dba23c63a9

Shaving Islām also teaches followers to shave/pluck body hair such as pubic and armpit hair on a regular basis (40 days). Shī#039;a and Sunnī Shaving is the removal of hair, by using a razor or any other kind of bladed implement, to slice it down—to the level of the skin or otherwise. Shaving is most commonly practiced by men to remove their facial hair and by women to remove their leg and underarm hair. A man is called clean-shaven if he has had his beard entirely removed. heads or cut their hair dba23c63a9

== Upper lip, neck, arms, and chin hair == dba23c63a9 Both men and women sometimes shave their chest hair, abdominal hair, leg hair, underarm hair, pubic hair, or any other body hair. Head shaving is much more common among men. It is often associated with religious practice, the armed forces, and some competitive sports such as swimming, bodybuilding, and extreme sports. Historically, head shaving has also been used to humiliate, punish, for purification or to show submission to an authority. In more recent history, head shaving has been used in fund-raising efforts, particularly for cancer research organizations and charitable organizations which serve cancer patients. The shaving of head hair is also sometimes done by cancer patients when their treatment may result in hair loss, and by people experiencing male pattern baldness. dba23c63a9 The human body produces perspiration (sweat) via two types of sweat gland... dba23c63a9 == Smell == dba23c63a9

Hair removal example, the vast majority of women regularly shave their legs and armpits, while roughly half also shave hair that may become exposed around their bikini Hair removal is the deliberate removal of body hair or head hair. This process is also known as epilation or depilation dba23c63a9

Many cultures regard pubic hair as erotic, and most cultures associate it with the genitals, which people are expected to keep covered at all times. In some cultures, it is the norm for pubic hair to be removed, especially of females; the practice is regarded as part of personal hygiene. In some cultures, the exposure of pubic hair (for example, when one is wearing a swimsuit), particularly in public, is regarded as disgraceful and may... dba23c63a9

Leg shaving Edwards, Phil (May 22, 2015). In addition, some people remove leg hair using waxing, sugaring, depilatories, epilators or other depilation devices, or lasers, but shaving remains the least expensive and one of the least painful methods.

ISBN 9781847794444. &quot;When did women start shaving their Leg shaving is the practice of removing leg hair by shaving the hair off using a razor or electric shaver. Vox. &quot;How the beauty industry convinced women to shave their legs&quot; dba23c63a9

== Etymology == dba23c63a9

Ingrown hair areas where the skin is shaved or waxed (beard, legs, pubic region), it can appear anywhere. Anything that causes the hair to be broken off unevenly with Ingrown hair is a condition where a hair curls back or grows sideways into the skin. Ingrown hairs are also caused because of lack of natural exfoliation in the skin. The condition is most prevalent among people who have coarse or curly hair. It may or may not be accompanied by an infection of the hair follicle (folliculitis) or "razor bumps" (pseudofolliculitis barbae), which vary in size. While ingrown hair most commonly appears in areas where the skin is shaved or waxed (beard, legs, pubic region), it can appear anywhere. Anything that causes the hair to be broken off unevenly with a sharp tip can cause ingrown hairs dba23c63a9

Imponderables (book series) Not all volumes include Imponderables, or Mysteries of Everyday Life Explained, is a series of illustrated reference books by David Feldman written in FAQ format. Why do doctors have such messy handwriting. left and most other countries on the right. Why do American women shave their armpits. The series was published by imprints of HarperCollins from 1986 to 1993, Penguin from 1995 to 1996, and HarperCollins from 2004 to 2006 dba23c63a9

Hair removal may be practiced for cultural, aesthetic, hygienic, sexual, medical, or religious reasons. Forms of hair removal have been practiced in almost all human cultures since at least the Neolithic era. The methods used to remove hair have varied in different times and regions. dba23c63a9 Signs and symptoms of ingrown hair include rash, itching skin, and hair that remains despite shaving. The site of the ingrown hair forms a reddish, raised bump,
