Mission Elapsed Time This avoids the constant rescheduling of events in case the launchtime slips. Due to the fact that timing is very consequential in a mission, all events after launch are scheduled on the Mission Elapsed Time. MET was formerly called Ground Elapsed Time (GET) until the 1981 launch of the Space Shuttle. For example, 2:03:45:18 MET means it has been 2 days, 3 hours, 45 minutes, and 18 seconds since liftoff. "Mission Elapsed Time (MET) is used by NASA during their space missions, most notably during their Space Shuttle missions. The MET-clock is set to zero at the moment of liftoff and counts forward in normal days, hours, minutes, and seconds. test flight of the Boeing CST-100 Starliner spacecraft suffered a mission anomaly through an incorrectly set Mission Elapsed Time on the vehicle 94b1cf4c4b

In 2003, Pierre-William Glenn, president of the CST, struggled to once again have a prize awarded to a technician during the Cannes Film Festival. Thus, the Vulcan Award of the Technical Artist was born as a part of the festival roster and approved by the festival's president Gilles Jacob. 94b1cf4c4b

== Aspects == 94b1cf4c4b The appearance of a simple lack of punctuality or a lax attitude about time in Africa, may instead reflect a different approach and method in managing tasks, events, and interactions. African cultures are often described as "polychronic", which means people tend to manage more than one thing at a time rather than in a strict sequence. Personal interactions and relationships are also managed in this way, such that it is not uncommon to have more than one simultaneous conversation. An African... 94b1cf4c4b The divisions between time zones were originally based on proposals by Scottish Canadian railway engineer Sandford Fleming, who pioneered the use of the 24-hour clock, the world's time zone system, and a standard prime meridian. 94b1cf4c4b On August 18, 1993, CST filed an application for tax exemption under... 94b1cf4c4b == History == 94b1cf4c4b

CSTS As no further funding was allocated at the conference, the project Crew Space Transportation System (CSTS), originally Advanced Crew Transportation System (ACTS), was a proposed design for a crewed spacecraft for low Earth orbit operations such as servicing the International Space Station, but also capable of exploration of the Moon and beyond. ACTS/CSTS was completed and submitted to a conference in November 2008 of ESA member states. It was a joint project between the European Space Agency (ESA) and the Russian Federal Space Agency (Federal'noye kosmicheskoye agentstvo Rossii - FKA) 94b1cf4c4b

The project was conceived as a basic strategic plan to keep a viable European human spaceflight program alive after the US space agency NASA declined the ESA's request to participate in the American Orion spacecraft project. Meanwhile the ESA had been in talks with the FKA aimed at the two organisations collaborating on the development of Kliper, which was to be a replacement for Russia's venerable Soyuz spacecraft. After NASA's decision, in mid-2006 the FKA and ESA agreed to cooperate on the ACTS, with funding limited to a feasibility study for a launch of an actual vehicle possible no earlier than 2017; the name of the proposed vehicle was then changed from Advanced Crew Transportation System to Crew Space Transportation System. The study phase of ACTS/CSTS... 94b1cf4c4b In 2019, it was renamed the « CST Award for Best Artist-Technician ». 94b1cf4c4b == References == 94b1cf4c4b Sengupta says he got the idea for the film when he took a picture of a dinosaur statue outside Kolkata's Science City, which was fast being overshadowed by the construction of a new flyover - a literal representation of a relic from the past, juxtaposed with a symbol of Kolkata's economic development.
