

Pain The Lower Right Back

Serious and relatively common causes include acute coronary syndrome such as a heart attack (31%), pulmonary embolism (2%), pneumothorax, pericarditis (4%), aortic dissection (1%) and esophageal rupture. Other common causes include gastroesophageal reflux disease (30%), muscle or skeletal pain (28%), pneumonia (2%), shingles (0.5%), pleuritis, traumatic and anxiety disorders. Determining the cause of chest pain is based on a person's medical history, a physical exam and other medical tests. About 3% of heart attacks, however, are initially missed. 5273e54916 Common causes of pain in the abdomen include gastroenteritis and irritable bowel syndrome. About 15% of people have a more serious underlying condition such as appendicitis, leaking or ruptured abdominal aortic aneurysm, diverticulitis, or ectopic pregnancy. In a third of cases, the exact cause is unclear. 5273e54916 Back pain is a common medical condition, generally benign in origin. 5273e54916 The episode tells the story of Martha (Hayley Atwell), a young woman whose boyfriend Ash Starmer (Domhnall Gleeson) is killed in a car accident. As she mourns him, she discovers that technology now allows her to communicate with an artificial intelligence imitating Ash, and reluctantly decides to try it. "Be Right Back" had two sources of inspiration: the question of whether to delete a dead friend's phone number from one's contacts and the idea that Twitter posts could be made by software mimicking dead people. 5273e54916

Pain Pain is a distressing bodily feeling often caused by intense or damaging stimuli. The International Association for the Study of Pain defines pain as "an unpleasant sensory and emotional experience associated with, or resembling that associated with, actual or potential tissue damage. ". The International Association for the Study of Pain defines pain as "an Pain is a distressing bodily feeling often caused by intense or damaging stimuli 5273e54916

Quadratus lumborum muscle It is the deepest abdominal muscle, and commonly referred to as a back muscle. Each muscle of the pair is an irregular quadrilateral in shape, hence the name. bilateral lower back pain, including localized pain and tenderness over the wing of the ilium. Because quadratus lumborum connects the pelvis to the spine The quadratus lumborum muscle, informally called the QL, is a paired muscle of the left and right posterior abdominal wall 5273e54916

Simple over-the-counter pain medications are useful in 20% to 70% of cases of common acute... 5273e54916

Referred pain where pain is often felt in the left side of the neck, left shoulder, and back rather than in the thorax (chest), the site of the injury. The International Referred pain, also called reflective pain, is pain perceived at a location other than the site of the painful stimulus. An example is the case of angina pectoris brought on by a myocardial infarction (heart attack), where pain is often felt in the left side of the neck, left shoulder, and back rather than in the thorax (chest), the site of the injury. The International Association for the Study of Pain has not officially defined the term; hence, several authors have defined it differently. Referred pain has been described since the late 1880s. Despite an increasing amount of literature on the subject, the biological mechanism of referred pain is unknown, although there are several hypotheses 5273e54916

Back pain The lumbar region is the most commonly affected area. Back pain (Latin: dorsalgia) is pain felt in the back. An episode of back pain may be acute, subacute or chronic depending on the duration. Discomfort can radiate to the arms and hands as well as the legs or feet, and may include numbness or weakness in the legs and arms. The pain may be characterized as a dull ache, shooting or piercing pain or a burning sensation. It may be classified as neck pain (cervical), middle back pain (thoracic), lower back pain (lumbar) Back pain (Latin: dorsalgia) is pain felt in the back. It may be classified as neck pain (cervical), middle back pain (thoracic), lower back pain (lumbar) or coccydynia (tailbone or sacral pain) based on the segment affected 5273e54916

== History == 5273e54916 A disorder of the quadratus lumborum muscles is pain due to muscle fatigue from constant contraction due to prolonged sitting, such as at a computer or in a car. Kyphosis and weak gluteal muscles can also contribute to the likelihood of quadratus lumborum pain. 5273e54916

Human back central area of recession. : dorsa), is the large posterior area of the human body, rising from the top of the buttocks to the back of the neck. The breadth of the back is created by the shoulders at the top and the pelvis at the bottom. It is the surface of the body opposite from the chest and the abdomen. The vertebral column runs the length of the back and creates a central area of recession. The breadth of the back is created by the shoulders at the top and the pelvis at the bottom. Back pain is a common medical condition The human back, also called the dorsum (pl 5273e54916

Pain is the most common reason for physician consultation in most developed countries. It is a major symptom in many medical conditions, and can interfere with a person's quality of life and general functioning. People in pain experience impaired concentration, working memory, mental flexibility, problem-solving and information processing speed, and are more likely to experience

irritability, depression, and anxiety. 5273e54916 The quadratus lumborum muscles originate from the wings of the ilium; their insertions are on the transverse processes of the upper four lumbar vertebrae plus the lower posterior border of the twelfth rib. Contraction of one of the pair of muscles causes lateral flexion of the lumbar spine, elevation of the pelvis, or both. Contraction of both causes extension of the lumbar spine. 5273e54916

Abdominal pain Given that, approaching the examination of a person and planning of a differential diagnosis is extremely important. Since the abdomen contains most of the body's vital organs, it can be an indicator of a wide variety of diseases. cancer Left lower quadrant Bowel: diverticulitis, sigmoid colon volvulus, bowel obstruction, gas accumulation, Toxic megacolon Right low back pain Liver: hepatomegaly Abdominal pain, also known as a stomach ache, is a symptom associated with both non-serious and serious medical issues 5273e54916

Management of chest pain is based on the underlying cause. Initial treatment often includes the medications aspirin and nitroglycerin. The response to... 5273e54916 Back pain is common; approximately nine of ten adults experience it at some point in their lives, and five in ten working... 5273e54916 The quadratus lumborum muscle originates by aponeurotic fibers into the iliolumbar ligament and the internal lip of the iliac crest for about 5 centimetres (2.0 in). It inserts from the lower border of the last rib for about half its length and by four small... 5273e54916 The majority of back pain is nonspecific and idiopathic. Common underlying mechanisms include degenerative or traumatic changes to the discs and facet joints, which can then cause secondary pain in the muscles and nerves and referred pain to the bones, joints and extremities. Diseases and inflammation of the gallbladder, pancreas, aorta and kidneys may also cause referred pain in the back. Tumors of the vertebrae, neural tissues and adjacent structures can also manifest as back pain. 5273e54916 "Be Right Back" explores the theme of grief and tells a melancholic story similar to the previous episode, "The Entire History of You". The episode received highly positive reviews, especially for the performances of Atwell and Gleeson. Some hailed it as the best episode of Black Mirror, though the ending divided critics. Several real-life artificial intelligence products have been compared to the one shown in the episode,... 5273e54916

Chest pain Other associated symptoms with chest pain can include Chest pain is pain or discomfort in the chest, typically the front of the chest. It can be divided into heart-related and non-heart-related pain. It may be described as sharp, dull, pressure, heaviness or squeezing. This may include the neck, left or right arms, cervical spine, back, and upper abdomen. Pain due to insufficient blood flow to the heart is also called angina pectoris. Associated symptoms may include pain in the shoulder, arm, upper abdomen, or jaw, along with nausea, sweating, or shortness of breath. areas of the body. Those with diabetes or the elderly may have less clear symptoms 5273e54916

Radiating pain is slightly different from referred pain; for example, the pain related to a myocardial infarction could either be referred or radiating pain from the chest. Referred pain is when the pain is located away from or adjacent to the organ involved; for instance, when a person has pain only in their jaw or left arm, but not in the chest. Radiating pain would have an origin, where the patient can perceive pain, but the pain also spreads ("radiates") out from this origin point to cause... 5273e54916

Be Right Back It was written by series creator and "Be Right Back" is the first episode of the second series of British science fiction anthology series Black Mirror. It was written by series creator and showrunner Charlie Brooker, directed by Owen Harris, and first aired on Channel 4 on 11 February 2013. "Be Right Back" is the first episode of the second series of British science fiction anthology series Black Mirror 5273e54916

Pain management during childbirth Childbirth is different for each woman and predicting the amount of pain experienced during birth and delivery can not be certain. The amount of pain a woman feels during labor depends partly on the size and position of her baby, the size of her pelvis, her emotions, the strength of the contractions, and her outlook. Virtually all women worry about how they will cope with the pain of labor and delivery. especially to the lower back area, while the cervix is dilating may help reduce pain during the first stage of labor and may even help to decrease the length of Pain management during childbirth is the partial treatment and a way of reducing any pain that a woman may experience during labor and delivery. Tension increases pain during labor 5273e54916

The central feature of the human back is the vertebral column, specifically the length from the top of the thoracic vertebrae to the bottom of the lumbar vertebrae, which houses the spinal cord in its spinal canal, and which generally has some curvature that gives shape to the back. The ribcage extends from the spine at the top of the back (with the top of the ribcage corresponding to the T1 vertebra), more than halfway down the length of the back, leaving an area with less protection between the bottom of the ribcage and the hips. The width of the back at the top is defined by the scapula, the broad, flat bones of the shoulders. 5273e54916 == Structure == 5273e54916 Prior to the 20th century, childbirth predominantly happened in the home, without access to any medical interventions for pain management. Childbirth was a leading cause of death for women, and many were fearful of the process, creating a large desire for pain management. But despite the demands of female patients, little relief was offered before the mid-19th century. Chemical anesthesia during labor was first introduced in 1847, receiving support from women and reluctance from physicians. Some doctors and religious authorities argued that pain relief in childbirth went contrary to God's choice... 5273e54916

Low back pain Low back pain may be classified by duration as acute (pain lasting less than 6 weeks), sub-acute (6 to 12 weeks), or chronic (more than 12 weeks). The symptoms of low back pain

usually improve within a few weeks from the time they start, with 40-90% of people recovered by six weeks. back pain or lumbago is a common disorder involving the muscles, nerves, and bones of the back, in between the lower edge of the ribs and the lower fold Low back pain or lumbago is a common disorder involving the muscles, nerves, and bones of the back, in between the lower edge of the ribs and the lower fold of the buttocks. Pain can vary from a dull constant ache to a sudden sharp feeling 5273e54916

Pain motivates animals to withdraw from damaging situations, to protect a damaged body part while it heals, and to avoid similar experiences in the future. Most pain resolves once the noxious stimulus is removed and the body has healed, but it may persist despite removal of the stimulus and apparent healing of the body. Sometimes pain arises in the absence of any detectable stimulus, damage or disease. 5273e54916 == Structure == 5273e54916 In most episodes of low back pain a specific underlying cause is not identified or even looked for: the pain is believed to be due to mechanical problems such as muscle or joint strain. If the pain does not go away with conservative treatment or if it is accompanied by "red flag" symptoms such as unexplained weight loss, fever, or significant problems with feeling or movement, further testing may be needed to look for a serious underlying problem. In most cases, imaging tools such as CT scans are not useful or recommended for low back pain that lasts less than 6 weeks (with no red flags) and carry their own risks. Some low back pain is caused by damaged intervertebral... 5273e54916
