

Black Stool Causes Death

The Reagan Democrats were members of the Democratic Party before and after the Reagan presidency, but voted for Reagan in 1980 and 1984 and for his vice president, George H. W. Bush, in 1988, producing their landslide victories. They were mostly white socially conservative blue-collar workers who lived in the Northeast and were attracted to Reagan's social conservatism on issues such as abortion and to his anti-communist hawkish foreign policy. They did not continue to vote Republican in 1992 or 1996, causing the term to fall into disuse except as a reference to the 1980s. The term is not generally used to describe the white Southerners who permanently changed party affiliation from Democrat to Republican during Reagan's presidency. They have largely remained Republican... 6673475769 == Forced ingestion == 6673475769

Toilet-related injuries and deaths The Valsalva There have been many toilet-related injuries and deaths throughout history and in urban legends. If defecation is suppressed over long periods, problems can occur, such as constipation or stool impaction. straining to pass a hardened stool 6673475769

Each stool is understood to be the seat of the owner's soul and when not in use it is placed against a wall so that other souls passing by may relax on it. The Golden Stool is the royal throne and must never touch the ground; instead it is placed on a blanket. During inauguration, a new king is raised and lowered over the stool without touching it. The Golden Stool is carried to the king on a pillow, as only the Asantehene himself is allowed to handle it. During solemn occasions, the Golden Stool is placed on the king's left on a throne of its own, the hwedom dwa (Asante, throne... 6673475769 == Medical uses == 6673475769 == Accidental injuries == 6673475769

Cefdinir tract; in rare cases, this causes rust or red discoloration of the stool. It may also be used as an alternative antibiotic for those with a severe penicillin allergy. Blood typically appears dark brown or black in stool, and testing may confirm Cefdinir, sold under the brand name Omnicef among others, is an antibiotic used to treat bacterial infections including bacterial pneumonia, other respiratory tract infections, otitis media, strep throat, and cellulitis. It is taken by mouth 6673475769

Reagan coalition In 1984, Reagan confirmed his support by winning nearly 60% of the popular vote and carrying 49 of the 50 states. use the stool as a means to criticize party leadership or another member of the stool, such is seen in the lament of the "death of the stool" with the The Reagan coalition was the combination of voters that Republican Ronald Reagan assembled to produce a major political realignment with his electoral landslide in the 1980 United States presidential election. The coalition was possible because of Democrat Jimmy Carter's losses in most socio-economic groups 6673475769

Paratyphoid is caused by the bacterium *Salmonella enterica* of the serotypes Paratyphi A, Paratyphi B, or Paratyphi C growing in the intestines and blood. They are usually spread by eating or drinking food or water contaminated with the feces of an infected person. They may occur when a person who prepares food is infected. Risk factors include poor sanitation as is found among poor crowded populations. Occasionally, they may be transmitted by sex. Humans are the only animals infected. Diagnosis may be based... 6673475769

Paratyphoid fever Some people develop a skin rash with rose-colored spots. Weakness, loss of appetite, and headaches also commonly occur. Paratyphoid and typhoid fever are types of enteric fever. Without treatment, symptoms may last weeks or months. "Global, regional, and national life expectancy, all-cause mortality, and cause-specific mortality Paratyphoid fever, also known simply as paratyphoid, is a bacterial infection caused by one of three types of *Salmonella enterica*. Other people may carry the bacteria without being affected; however, they are still able to spread the disease to others. Typhoid and paratyphoid are of similar severity. Symptoms usually begin 6–30 days after exposure and are the same as those of typhoid fever. Often, a gradual onset of a high fever occurs over several days. Mortality and Causes of Death Collaborators (8 October 2016) 6673475769

The exact cause of SIDS is unknown. The requirement of a combination of factors including a specific underlying susceptibility, a specific time in development, and an environmental stressor has been proposed. These environmental stressors may include sleeping on the stomach or side, overheating, and exposure to tobacco smoke. Accidental suffocation from bed sharing (also known as co-sleeping) or soft objects may also play a role. Another risk factor is being born before 37 weeks of gestation. Between 1% and 5% of SIDS cases are estimated to be misidentified infanticides caused by intentional suffocation. SIDS makes up about 80% of sudden... 6673475769 Bleeding is typically divided into two main types: upper gastrointestinal bleeding and lower gastrointestinal bleeding. Causes of upper GI bleeds include: peptic ulcer disease, esophageal varices due to liver cirrhosis and cancer, among others. Causes of

lower GI bleeds include: hemorrhoids, cancer, and inflammatory bowel disease among others. Small amounts of bleeding may be detected by fecal occult blood test. Endoscopy of the lower and upper gastrointestinal tract may locate the area of bleeding. Medical imaging may be useful in cases that are not clear. Bleeding may also...

Golden Stool Such seats were traditionally symbolic of a chieftain's leadership, but the Golden Stool is believed to house the spirit of the Asante nation—living, dead and yet to be born. The Golden Stool (Ashanti-Twi: Sika dwa; full title, Sika Dwa Kofi "the Golden Stool born on a Friday") is the royal and divine throne of kings of the The Golden Stool (Ashanti-Twi: Sika dwa; full title, Sika Dwa Kofi "the Golden Stool born on a Friday") is the royal and divine throne of kings of the Asante people and the ultimate symbol of power in Asante. According to legend, Okomfo Anokye, High Priest and one of the two chief founders of the Asante Confederacy, caused the stool to descend from the sky and land on the lap of the first Asante king, Osei Tutu 6673475769

Constipation have two to three per day. Other symptoms may include abdominal pain, bloating, and feeling as if one has not completely passed the bowel movement. Babies often have three to four bowel movements per day while young children typically have two to three per day. Constipation has many causes. The normal frequency of bowel movements in adults is between three per day and three per week. The stool is often hard and dry. Common causes include slow movement of stool within the colon, irritable bowel syndrome, and pelvic Constipation is a bowel dysfunction that makes bowel movements infrequent or hard to pass. Complications from constipation may include hemorrhoids, anal fissure or fecal impaction 6673475769

Infants and toddlers have fallen headfirst into toilet bowls and drowned. Safety devices exist to help prevent such accidents. It is highly unlikely for adults or teenagers to drown in toilets due to their larger body size. Injuries to adults include bruised buttocks and tail bones, as well as dislocated hips that have resulted from unexpectedly sitting on the toilet bowl rim because the seat is up or loose. Injuries can also be caused by pinching due to splits in plastic seats and/or by splinters from wooden seats, or if the toilet itself collapses or shatters under the user's weight. Older high-tank cast-iron cisterns have been known to detach from the wall when the chain is pulled to flush, causing injuries to the user. The 2000 Ig Nobel Prize in Public Health was awarded to three physicians from the Glasgow Western Infirmary for a 1993 case report on wounds sustained to the buttocks due to collapsing toilets. Furthermore, injuries are frequently sustained by people who stand on toilets to reach a height, then slip and fall. There are also

instances of people... 6673475769 Constipation has many causes. Common causes include slow movement of stool within the colon, irritable bowel syndrome, and pelvic floor disorders. Underlying associated diseases include hypothyroidism, diabetes, Parkinson's disease, celiac disease, non-celiac gluten sensitivity, vitamin B12 deficiency, colon cancer, diverticulitis, and inflammatory bowel disease. Medications associated with constipation include opioids, certain antacids, calcium channel blockers, and anticholinergics. Of those taking opioids about 90% develop constipation. Constipation is more concerning when there is weight loss or anemia, blood is present in the stool, there is a... 6673475769 Therapeutic uses of cefdinir include otitis media, soft tissue infections, and respiratory tract infections including sinusitis, strep throat (for penicillin-allergic patients), community-acquired pneumonia, and acute exacerbations of bronchitis. 6673475769

Gastrointestinal bleeding Sometimes in those with small amounts of bleeding no symptoms may be present. Small amounts of bleeding over a long time may cause iron-deficiency anemia resulting Gastrointestinal bleeding (GI bleed), also called gastrointestinal hemorrhage (GIB), is all forms of bleeding in the gastrointestinal tract, from the mouth to the rectum. vomiting red blood, vomiting black blood, bloody stool, or black stool. Small amounts of bleeding over a long time may cause iron-deficiency anemia resulting in feeling tired or heart-related chest pain. Other symptoms may include abdominal pain, shortness of breath, pale skin, or passing out. When there is significant blood loss over a short time, symptoms may include vomiting red blood, vomiting black blood, bloody stool, or black stool 6673475769

It is a third-generation cephalosporin antibiotic and works by interfering with a bacteria's ability to make a cell wall, resulting in its death. 6673475769

SIDS m. of the leading causes of infant mortality in Western countries, constituting almost 1/3 of all post-neonatal deaths. Diagnosis requires that the death remain unexplained even after a thorough autopsy and detailed death scene investigation. SIDS remains one of the leading causes of infant mortality in Western countries, constituting almost 1/3 of all post-neonatal deaths. The exact cause of SIDS is unknown Sudden infant death syndrome (SIDS), sometimes known as cot death or crib death, is the sudden, unexplained death of a child of less than one year of age. There is usually no noise or evidence of struggle. , or when the baby is sleeping. SIDS usually occurs between the hours of midnight and 9:00 a 6673475769

The most common cause is an infection of the intestines due to a virus, bacterium, or parasite—a condition also known as gastroenteritis. These infections are often acquired from food or water that has been contaminated by feces, or

directly from another person who is infected. The three types of diarrhea are: short duration watery diarrhea, short duration bloody diarrhea, and persistent diarrhea (lasting more than two weeks, which can be either watery or bloody). The short duration watery diarrhea may be due to cholera, although this is rare in the developed world. If blood is present, it is also known as dysentery... 6673475769

Water torture "ducking stool" appear from 1597, and a statement in 1769 relates that "ducking-stool" is a corruption of the term "cucking-stool". Whereas a cucking-stool could Water torture encompasses a variety of techniques using water to inflict physical or psychological harm on a victim as a form of torture or execution 6673475769

== Symbology and ritual == 6673475769 Common side effects include diarrhea, nausea, and a skin rash. Serious side effects may include Clostridioides difficile infection, anaphylaxis, and Stevens-Johnson syndrome. Use in pregnancy and breastfeeding is believed to be safe but has not been well studied. 6673475769

Diarrhea Signs of dehydration often begin with loss of the normal stretchiness of the skin and irritable behaviour. Loose but non-watery stools in babies who are exclusively breastfed, however, are normal. The most common cause is an infection of the intestines Diarrhea (American English), also spelled diarrhoea (British English), is the condition of having at least three loose, liquid, or watery bowel movements in a day. Loose but non-watery stools in babies who are exclusively breastfed, however, are normal. severe. This can progress to decreased urination, loss of skin color, a fast heart rate, and a decrease in responsiveness as it becomes more severe. It often lasts for a few days and can result in dehydration due to fluid loss 6673475769
