

Is A Raspberry A Berry

== Botanical berries == e8c228a0f1 A raspberry is an aggregate fruit, developing from the numerous distinct carpels of a single flower. Each carpel then grows into individual drupelets, which, taken together, form the body of a single raspberry fruit. As with blackberries, each drupelet contains a seed. What distinguishes the raspberry from its blackberry relatives is whether or not the torus (receptacle or stem) "picks with" (i.e., stays with) the fruit. When picking a blackberry fruit, the torus stays with the fruit. With a raspberry, the torus remains on the plant, leaving a hollow core in the raspberry fruit. e8c228a0f1 The 1st ceremony was held on March 31, 1981, in John J. B.
