She has collaborated with Lady Gaga, Beyonce, Jennifer Lopez, Alicia Keys, Jay-Z, and Kanye West. 0a5ac81300 Israel is home to major companies in the high-tech industry. In 1998, Tel Aviv was named by Newsweek as one of the ten most technologically influential cities in the world. Since 2000, Israel has been a member of EUREKA, the pan-European research and development funding and coordination organization, and held the rotating chairmanship of the organization for 2010–2011. In 2010, American journalist David Kaufman wrote that the high-tech area of Yokneam, Israel, has the "world's largest concentration of aesthetics-technology companies". Google chairman Eric Schmidt complimented the country during a visit there, saying that "Israel has... 0a5ac81300

Larrabee (microarchitecture) newly formed team. The Intel Visual Computing Institute Larrabee is the codename for a cancelled GPGPU chip that Intel was developing separately from its current line of integrated graphics accelerators. It is named after either Mount Larrabee or Larrabee State Park in the state of Washington. The chip was to be released in 2010 as the core of a consumer 3D graphics card, but these plans were cancelled due to delays and disappointing early performance figures. The project to produce a GPU retail product directly from the Larrabee research project was terminated in May 2010 and its technology was passed on to the Xeon Phi. The 3D stack specifically was written by developers at RAD Game Tools (including Michael Abrash) 0a5ac81300

Tinder (app) In 2025, the platform had 75 million monthly active users, including 9 million paying users, and generated \$1. 862 billion in revenue and \$832 million in operating income. It was launched in 2012 and is owned by Match Group. Along with Bumble and Hinge, Tinder is one of the most popular dating apps worldwide. selections a user makes are not known to other users, unless two users swipe right on each other's profiles. Tinder uses a freemium model; the platform is free, but users must pay for additional functions and features. In January 2012, Sean Rad was hired as general Tinder operates a platform for online dating and geosocial networking accessible via Web site and mobile app. It is available in 190 countries and 60 languages. It has a minimum age requirement of 18 0a5ac81300

Nic Radford Prior to forming Nicolaus Adam Radford, known as Nic Radford (born November 5, 1977), is an American engineer, roboticist, inventor, and entrepreneur raising over \$500mm in funding for his companies. He also founded Jacobi Motors, his company spun out of HMI to commercialize his variable flux motor research from graduate school. Johnson Space Center's Dexterous Robotics Laboratory at NASA in Houston, Texas. He also started Rad Capital Ventures to invest in the trading of electricity. Currently, he is a co-founder and CEO of Persona AI Inc, a Humanoid company focused on building a modularized humanoid robot labor platform for industrial applications. He also started Rad Capital Ventures to invest in the trading of electricity. (NASDAQ:KITT) a maritime robotics firm he co-founded. Prior to forming HMI, he spent 14 years at Lyndon B. Radford was the principal investigator tasked with leading the development of Valkyrie for participation in the 2013 DARPA Robotics Challenge (DRC) and NASA's future Mars robotics missions. He is the former president and CEO of Nauticus Robotics, Inc. commercialize his variable flux motor research from graduate school 0a5ac81300

Announced in 2009, The Witness had a lengthy development period. Jonathan Blow, the game's lead designer, started work on the title in 2008, shortly after releasing Braid. The financial success of Braid allowed him to hire a larger production team without ceding creative control over the final product. To create the game's visual language, the team developed their own game engine and retained artists, architects, and landscape architects to design the structures on the island. This required a protracted development... 0a5ac81300 Israel counts 140 scientists and technicians per 10,000 employees, one of the highest ratios in the world. In comparison, there are 85 per 10,000 in the United States and 83 per 10,000 in Japan. In 2012, Israel counted 8,337 full-time equivalent researchers per million inhabitants. This compares with 3,984 in the US, 6,533 in the Republic of South Korea and 5,195 in Japan. 0a5ac81300 The utility of clinical diagnostic testing relies squarely on the validity of test methodology. To this end, much of the work done by medical

laboratory scientists involves ensuring specimen quality, interpreting test results, data-logging, testing control products, performing calibration, maintenance, validation, and troubleshooting of instrumentation as well as performing statistical analyses to verify the accuracy and repeatability of testing. Medical laboratory scientists may also assist healthcare providers with test selection and specimen collection and are responsible for prompt verbal delivery of critical lab results. Medical laboratory scientists... Almost a decade later, on June 12, 2018; the idea of an Intel dedicated GPU was revived again with Intel's desire to create a discrete GPU by 2020. This project would eventually become the Intel Xe and Intel Arc series, released in September 2020 and March 2022, respectively - but both were unconnected to the work on the Larrabee project.

Silicon Wadi More recent high-tech establishments have been raised in cities such as Jerusalem and Beersheba, in towns such as Yokneam Illit, and in Airport City. 'Silicon Valley') is a region in Israel that serves as one of the global centres for advanced technology. The highest concentrations of high-tech industry in the region can be found around Tel Aviv, including small clusters around the cities of Ra'anana, Petah Tikva, Herzliya, Netanya, Rehovot, and Ness Ziona. Israel has the third highest number of startups by region, the highest rate of startups per capita in the world, with one in three cybersecurity unicorns in the world being an Israeli company. Additional clusters of high-tech industry can be found in Haifa and Caesarea. high-tech park in Petah Tikva Start-up village high-tech park in Yokneam Illit Atidim industrial zone in Raanana Microsoft building in Haifa The RAD Group Silicon Wadi (Hebrew: סִילִיקוֹן יִאָדִי, lit. It spans the Israeli coastal plain, and is cited as among the reasons why the country has become known as the world's "start-up nation" (see science and technology in Israel)

Shooting guns from stable benchrests may also provide a stable platform for sighting in less specialized firearms, including even handguns, shotguns and muzzleloaders, as it eliminates most of the human...

Medical laboratory scientist scientist (ASCP) and medical technologists (AMT) or (AAB) are often called "med techs" (based on the era in which they were known as "medical technologists") A medical laboratory scientist (MLS), clinical laboratory scientist (CLS), or medical technologist (MT) is a licensed healthcare professional who performs diagnostic testing of body fluids, examples: blood, urine, sputum and other body tissue. The medical technologist is tasked with releasing the patient's results to aid in further treatment. The scope of a medical laboratory scientist's work begins with the receipt of patient or client specimens, and finishes with the delivery of test results to physicians and other healthcare providers

The Witness (2016 video game) The player progresses by solving puzzles, which are based on interactions with grids presented on panels around the island or paths hidden within the environment. No direct instructions are provided for solving these puzzles, requiring the player to identify the meaning of symbols in the puzzles. Chloi Rad of IGN awarded the game a perfect score of 10/10, calling it a masterpiece The Witness is a 2016 puzzle video game developed and published by Thekla, Inc. Inspired by Myst, the game involves the exploration of an open world island filled with natural and human-made structures. A central design element was how these puzzles are presented so that the player can achieve a moment of inspiration through trial and error and gain that comprehension themselves. platforms, according to the review aggregator website Metacritic

The term "Silicon Wadi" is a pun-name derived from a similarly high-tech region in the United States known as Silicon Valley, which is located in California. The word "wadi" derives from the Arabic "وادي", meaning 'valley'. Shelter in place in radiological and chemical defense scenarios entails closing all household doors, windows, and vents and taking immediate shelter in a readily accessible location that puts as much indoor air and radiation shielding-mass between the individual and the hazardous outside air, such as a basement or centrally located medium to small room, and trying to make it as airtight as possible by shutting off all ventilation/HVAC systems and extensively sealing the shelter's doors and windows from all outside air contaminants with damp towels, or if available, plastic sheeting and adhesive tape. Diagrams of what sheltering in place entails following... == History == Project status ==

Science and technology in Israel In 2019, Israel was ranked the world's seventh most innovative country by the Bloomberg Innovation Index. "Venture capital invests in Israeli techs / Recovering from recession, country ranks behind only Boston, Silicon Valley Science and technology in Israel is one of the country's most developed sectors. Kalman, Matthew (2 April 2004). 2013

To use the service, Tinder users create a profile with photos, a short biography, and list of interests and then "swipe right" to "like" or "swipe left" to "dislike" other users' profiles. The platform uses a "double opt-in" system, also called "matching", where two users must "like" each other before they can exchange messages; the selections a user makes are not known to other users, unless two users swipe right on each other's profiles. == Etymology == Preceding the DRC, he operated as deputy and chief engineer for Robonaut 2 (R2), a humanoid robot that was developed in partnership between NASA and General Motors. Additionally, during his tenure at NASA... Described as a "rad feminist" by Julianne E. Shepherd, editor-in-chief of Jezebel, and as "an activist filmmaker tackling some of the biggest issues facing the world," Pal-Chaudhuri is a human rights, sustainable growth, freedom, and economic empowerment advocate. Recognized by the United Nations as a Women's Entrepreneurship Distinguished Fellow...

Benchrest shooting This is in contrast to other shooting disciplines, where the shooter has to bear at least part of the gun's weight while holding it steady to aim, even when using support devices such as bipods, tripods or shooting sticks. When shooting, the shooter simply sits/stands comfortably behind the table/bench, operates the action and pulls the trigger, without needing to worry about carrying any weight of the

gun. 699 in) (32 μ Rad) (there are no ten-shot Benchrest shooting is a shooting sport discipline in which high-precision rifles are rested on a table or bench – rather than being carried in the shooter's hands – while shooting at paper or steel targets, hence the name "benchrest". Both the forearm and buttstock of such a rifle are usually fully supported by bean bags, a bipod/monopod (front/rear) combination, and/or a specially designed fixture device called shooting rest (which may be one- or two-piece depending on competition rules), so that the gun can remain stably pointing at the target without needing to be held by someone. 8 millimetres (0. millimetres (3 in) (84 μ Rad), the 550 metres (600 yd) record for a single five-shot group is 17 0a5ac81300

On December 4, 2009, Intel officially announced that the first-generation Larrabee would not be released as a consumer GPU product. Instead, it was to be released as a development platform for graphics and high-performance computing. The official reason for the strategic... 0a5ac81300
