

What Does Semen Smell Like

In traditional Chinese medical theory, the shen (肾; "kidney") organ system was considered the reservoir for semen, bone marrow, brain matter, and other bodily fluids. However, in actual fact, huanjing bunao often leads to retrograde ejaculation, which redirects the semen into the bladder, from where it is expelled along with urine. Anatomically speaking, circulating seminal fluid or "seminal essence" throughout the body is impossible. While... 4ad2c67968

Olfactory reference syndrome g. sniffing, touching their nose or opening a window, as being referential to an unpleasant body odor which in reality is non-existent and cannot be detected by other people. People with this condition often misinterpret others' behaviors, e. similar to bodily substances, e. g. feces, flatus, urine, sweat, vomitus, semen, vaginal secretions; or alternatively it may be an unnatural, non-human Olfactory reference syndrome (ORS) is a psychiatric condition in which there is a persistent false belief and preoccupation with the idea of emitting abnormal body odors which the patient thinks are foul and offensive to other individuals 4ad2c67968

Dr. Gilbert Stanley Bogle, born in 1924, was a physicist who worked at the Commonwealth Scientific and Industrial Research Organisation (CSIRO) on the campus of the University of Sydney. Married with three children, he was considered to be a brilliant scientist and had been a Rhodes Scholar. The police discovered that Bogle had casual relationships with other women, some of which involved assignations at local parks. The coroner stood down a key female witness before she could give evidence, to protect her family and that of Bogle. 4ad2c67968 As a young woman, Satyavati met the wandering rishi (sage) Parashara, who fathered her son Vyasa out of wedlock. The sage gave blessed her with a sweet, musky body fragrance that could spread across the distance of one yojana, which earned her names like Yojanagandha ("She whose fragrance is spread as far as... 4ad2c67968

Bertrand Duchaufour He has had a prolific career, beginning in Grasse at Lautier Florasynth and continuing for a number of fragragrance firms as well as working independently and as the house perfumer for L'Artisan Parfumeur. fu:ɣ]) is a French perfumer. 10 smells that changed the perfume industry". Detection dog Hunting dogs A detection dog or sniffer dog is a dog that is trained to use its senses to detect substances such as explosives, illegal drugs, wildlife scat, semen, currency, blood, and contraband electronics, such as illicit mobile phones. The sense most used by detection dogs is smell. There is some overlap, as in the case of cadaver dogs, trained to search for human remains. wildlife scat, semen, currency, blood, and contraband electronics, such as illicit mobile phones. Hunting dogs that search for game, and search and rescue dogs that work to find missing humans are generally not considered detection dogs but fit instead under their own categories. The sense most used by detection dogs is smell 4ad2c67968

This disorder is often accompanied by shame, embarrassment, significant distress, avoidance behavior, social phobia and social isolation. 4ad2c67968 Beginning his career in 1985, Bertrand Duchaufour trained at the Lautier Florasynth group in Grasse, then spent 10 years at Créations Aromatiques, then Symrise, working in their fine fragrance department. His first signed fragrance came in 1995, creating Amber & Lavender for Jo Malone. In 2008, he became an independent perfumer, taking on work directly, including at L'Artisan Parfumeur as house perfumer. In 2014, he joined fragrance firm TechnicoFlor, where he has been consulting for three years. 4ad2c67968 Satyavati fish called Adrika. Due to the smell emanating from her body, Satyavati was known as Matsyagandha ('She who smells like fish'), and helped her father, Satyavati (Sanskrit: सत्यवती, IAST: Satyavatī; also spelled Satyawati) is a character in the ancient Hindu epic Mahabharata. Her story appears in the Mahabharata, the Harivamsa, and the Devi Bhagavata Purana. She was the queen of the Kuru kingdom, married to king Shantanu of Hastinapura, and is a great-grandmother of the Pandava and Kaurava princes. She is also the mother of the seer Vyasa, author of the epic 4ad2c67968 == Signs and symptoms == 4ad2c67968 Generally speaking, people who choose to wear diapers for recreational purposes (as opposed to medical need or situational convenience) may informally classify themselves as "diaper lovers" (DLs), yet vary widely in their motivation, interest and focus of attention. 4ad2c67968 == Description == 4ad2c67968 == Background == 4ad2c67968 While some use diapers to achieve or enhance sexual pleasure as part of a kink or fetish, others find diapers to be a source of non-sexual positive feelings, such as comfort, relaxation, nostalgia, as well as being loved or cared for. This is not a dichotomy, however, as many DLs experience both sexual and non-sexual gratification. (Strictly speaking, the term "diaper fetishism" may only apply to those who derive at... 4ad2c67968 In 2006, Peter Butt, a filmmaker, discovered evidence to suggest the cause of death was hydrogen sulphide (H2S) gas. In the early hours of 1 January, an eruption of gas from the polluted river bed may have occurred, causing the noxious fumes to pool in deadly quantities in the grove. 4ad2c67968 Body odor Staphylococcus hominis is also known Body odor or body odour (BO) is the unique odor secreted by an animal or produced by microorganisms on an animal's outermost surfaces. male armpits to give off a rancid/cheese-like smell, whereas female armpits give off a more fruity/onion-like smell. Body odor has a strong genetic basis, but it can also be strongly influenced by various factors, such as sex, diet, health, and medication. It is present in all animals, and its intensity can be influenced by many factors (behavioral patterns, survival strategies). The body odor of human males plays an important role in human sexual attraction as a powerful indicator of genetic variation (MHC/HLA heterozygosity); significant evidence suggests that women are attracted to men whose body odor is different from theirs, indicating that they have immune genes that are different from their own, which may produce healthier offspring 4ad2c67968 A police dog is essentially a detection dog that is used as a resource, for police in specific scenarios such as conducting drug raids, finding missing criminals, and locating stashed currency. Frequently, detection dogs are thought to be used for law enforcement purposes. Experts say that dog-sniff evidence should not be used in the criminal justice system, pointing to wrongful convictions, human biases that skew animal behavior, and the lack of systematic research into what dogs detect or how they do it. 4ad2c67968 The onset of ORS may be sudden, where it usually follows after a precipitating event, or gradual. 4ad2c67968 Garbha Upanishad 'Esoteric Doctrine over the Embryo'), or Garbhopanishad (Garbhopaniṣad), is one of the minor Upanishads, listed number 17 in the modern anthology of 108 Hindu Upanishadic texts. dominance of male semen results in a male child while a female child is born when there is surfeit of female or mother's semen. When semen of

both male and The Garbha Upanishad (Sanskrit: गार्ग्य उपाधिषद्, romanized: Garbha Upaniṣad, lit. The last verse of the Upanishad attributes the text to sage Pippalada, but the chronology and author of the text is unclear, and the surviving manuscripts are damaged, inconsistent with each other and incomplete. Written in Sanskrit, it is associated with the Krishna Yajurveda by some, and as a Vedantic Upanishad associated with the Atharvaveda by other scholars. It is considered one of the 35 Samanya (general) Upanishads

Diaper fetishism Additionally, some people may choose to primarily stick Diaper fetishism (American English), or nappy fetishism (British English), is a type of garment fetish in which a person derives pleasure from themselves or partners wearing or using a diaper. When combined with paraphilic infantilism, the fetish is often called adult baby/diaper lover or AB/DL for short. These kinks may include paraphilic infantilism, omorashi (also called wetting), and BDSM. Diaper fetishism can be performed on its own or incorporated into other various kinks. diaper by saturating the polymer gel core with water, other liquids, blood, semen, or soft solids

Although detection dogs are often used for law enforcement purposes, they are also used as a valuable research tool for wildlife biologists... == Causes ==

Huanjing bunao According to this practice, retaining unejaculated jing (精; "semen; [medical] essence of life") supposedly allows it to rise through the spine to nourish the brain and enhance overall well-being. 'returning the semen/essence to replenish the brain' or coitus reservatus) is a Daoist sexual practice and yangsheng ("nourishing life") method aimed at maintaining arousal for an extended plateau phase while avoiding orgasm. These range from meditative approaches involving breath-control or visualization to manual techniques such as pressing the perineum or squeezing the urethra. Daoist adepts have been exploring various methods to avoid ejaculation for more than two thousand years. 'returning the semen/essence to replenish the brain' or coitus reservatus) is a Daoist sexual Huanjing bunao (traditional Chinese: 还精补脑; simplified Chinese: 还精补脑; lit. Pyrus calleryana "Why All Of New York City Smells Like Sex". Why the Trees on Your Street Smell Like Semen". Business Insider Australia Pyrus calleryana, also known as the Callery pear, is a species of pear tree native to East Asia in the family Rosaceae. Spector, Dina (April 26, 2013). Its cultivar Bradford pear, known for its offensive odor that some have described as akin to "rotting fish", is widely planted throughout the United States and increasingly regarded as an invasive species. Vice

The fruits (which are often assumed to be inedible due to their abundant, cyanide-laced seeds) of the Callery pear are small (less than 1 centimetre (3⁄8 in) in diameter) and hard, almost woody, until softened by frost, after which they are readily taken by birds, which disperse the seeds in their droppings. When fully softened, their fruit pulp is palatable to humans as well. In summer, the shining foliage is dark green and very... == Behavior and attraction == 4ad2c67968 == Career == 4ad2c67968 Margaret Olive Chandler (née Morphett), born in... 4ad2c67968 The Garbha Upanishad is a text that almost exclusively comments on medical and physiology-related themes, dealing with the theory of the formation and development of the human embryo and human body after birth. Paul Deussen et al. consider this Upanishad on the garbha or human embryo to be more like "a manual on physiology or medicine" than a spiritual text, with the exception of a passage which includes a number of statements about the foetus' awareness, including the assertion that the foetus has knowledge of... 4ad2c67968 Satyavati was the foster daughter of a fisherman chieftain, Dasharaja and was brought up as a commoner on the banks of the river Yamuna. Satyavati was the biological daughter of the Chedi king Uparichara Vasu (Vasu) and a cursed apsara (celestial being), who was turned into a fish called

Adrika. Due to the smell emanating from her body, Satyavati was known as Matsyagandha ("She who smells like fish"), and helped her father, Dasharaja, in his job as ferryman and fisherman. 4ad2c67968 Pyrus calleryana is deciduous, growing to 5 to 8 m (16 to 26 ft) tall, often with a conical to rounded crown. The leaves are oval, 4 to 8 cm (1+1/2 to 3 in) long, glossy dark green above, and pale beneath. They have long petioles alternately arranged on branches. The white, five-petaled flowers are about 2 to 2.5 cm (3/4 to 1 in) in diameter. They are produced abundantly in early spring, before the leaves expand fully. 4ad2c67968

Bogle-Chandler case The case became famous because of the circumstances in which the bodies were found and because the cause of death could not be established. Gilbert Bogle and Margaret Chandler on the banks of the Lane Cove River in Sydney, Australia on 1 January 1963. At a level above 100 The Bogle-Chandler case refers to the mysterious deaths of Dr. ppm, a victim will barely notice a bad smell; at 30+ ppm H₂S smells like rotten eggs but at 50-100 ppm it smells cloyingly sweet 4ad2c67968
