Marnell grows up in Washington, D.C. Her father is an abusive and controlling psychiatrist who eventually has her older sister sent to the Cross Creek Manor reform school, where her movements are severely restricted. To escape her father's rages, Marnell asks to attend boarding school and is sent to Lawrence Academy. After recreationally taking Ritalin, Marnell believes she has ADHD. Her father prescribes the drug to her and Marnell begins to use it both as a study aid and recreationally. In her final year of school, she discovers she is pregnant and delays having an abortion for so long that she enters her second trimester of pregnancy. After being accepted to Bard College in 2000, she

Circuit split circuit splits may also be beneficial by virtue of the fact that citizens in different parts of the country have different preferences for how to structure In United States federal courts, a circuit split, also known as a split of authority or split in authority, occurs when two or more different circuit courts of appeals provide conflicting rulings on the same legal issue. The existence of a circuit split is one of the factors that the Supreme Court of the United States considers when deciding whether to grant review of a case. Some scholars suggest that the Supreme Court is more likely to grant review of a case to resolve a circuit split than for any other reason 80471d87c4

== Premise == 80471d87c4 The "reverse stock split" appellation is a reference to the more common stock split in which shares are effectively divided to form a larger number of proportionally less valuable shares. New shares are typically issued in a simple ratio, e.g. 1 new share for 2 old shares, 3 for 4, etc. A reverse split is the opposite of a stock split. 80471d87c4 == 2000 == 80471d87c4 The main effect of stock splits is an increase in the liquidity of a stock: there are more buyers and sellers for 10 shares at \$10 than 1 share at \$100. Some companies avoid a stock split to obtain the opposite strategy: by refusing to split the stock and keeping the price high, they reduce trading volume. Berkshire Hathaway is a notable example of this. As of 2025, the company has never split its stock and trades at over US\$750,000. 80471d87c4
