He was born into a dysfunctional family, and his mother was forced to leave when he was three. When his father went to war, he was sent to a farm. After his father's return from war, they moved to Christchurch. He was accepted to St Andrew's College, a private school, as his father had served under a former headmaster. Kerr's mathematical talent was first recognised while he was still a student at St Andrew's College. Although there was no mathematics teacher there at the time, he was able in 1951 to go straight into the third year of mathematics at Canterbury University College, a constituent of the University of New Zealand and the precursor to the University of

Religious and philosophical views of Albert Einstein " In other interviews, he noted his belief in a cosmic "lawgiver" who sets the laws of the universe. Albert Einstein stated "I believe in Spinoza's God". Albert Einstein's religious views have been widely studied and often misunderstood. He did not believe Albert Einstein's religious views have been widely studied and often misunderstood. Einstein rejected a conflict between science and religion, and held that cosmic religion, defined in his book by that title as one "which recognizes neither dogmas nor God made in man's image," was necessary for science. Einstein also stated he did not believe in life after death, adding "one life is enough for me. He did not believe in a personal God who concerns himself with fates and actions of human beings, a view which he described as naïve. " He was closely involved in his lifetime with several humanist groups. He clarified, however, that, "I am not an atheist", preferring to call himself an agnostic, or a "religious nonbeliever. Subtle Is the Lord The book has received many reviews and, the year after its initial publication, it won both the 1983 National Book Award for Nonfiction, in Science (Hardcover), and the 1983 Science. Pais later released a sequel to the book in 1994 titled *Einstein Lived Here* and, after his death in 2000, the University Press released a posthumous reprint of the biography in 2005, with a new foreword by Roger Penrose. This was not the first popular biography of Einstein, but it was the first to focus on his scientific research as opposed to his life as a popular figure. First published in 1982 by Oxford University Press, the book is one of the most acclaimed biographies of the scientist. First published in 1982 by "Subtle Is the Lord"—*The Science and the Life of Albert Einstein* is a biography of Albert Einstein written by Abraham Pais. Pais, renowned for his work in theoretical particle physics, was a friend of Einstein's at the Institute for Advanced Study. Originally published in English in the United States and the United Kingdom, the book has translations in over a dozen languages. Considered very popular for a science book, the biography sold tens of thousands of copies of both paperback and hardcover versions in its first year.
