Tortillas were first made by... The business for most of its existence was owned by companies controlled by Garfield Weston and his family. In 1986 it was sold to the Dee Corporation, operators of Gateway Foodmarkets. Following this, the stores were closed or rebranded, and by late 1988 the Fine Fare name had been phased out. Corn tortillas are made by treating corn with limewater, a process known as nixtamalization, forming a dough known as masa, which is baked on a griddle. Flour tortillas are made of refined wheat flour, water, and shortening, and are generally larger than corn tortillas. Both types are commonly industrially produced, with corn tortillas usually using a dehydrated form of masa called masa harina. Tortillas are soft but quickly become stale. They are high in calories but lack essential nutrients. Fresh tortillas can be used to carry various ingredients, forming dishes such as the taco, burrito, enchilada, and quesadilla. They may instead be used as a spoon to pick up accompanying food. Other uses of tortillas include dishes such as tortilla soup and fried products such as tostadas and tortilla chips.
