== History == 9954f5ec66 At the start of the pandemic, specifically in March 2020, chloroquine emerged as a possible treatment for the disease based on two studies of questionable quality. Notably, Donald Trump, United States President at the time, endorsed one of these studies, challenging the recommendations of the Food and Drug Administration (FDA), which led to the politicization of the issue. In Brazil, President Jair Bolsonaro quickly adopted this stance. In the following months, the Brazilian government took steps to promote chloroquine and hydroxychloroquine as treatments for COVID-19. This included ordering production, coordinating distribution, and spending approximately 90 million reais on acquiring these drugs. Additionally, the Ministry of Health, under... 9954f5ec66 Anxiety about COVID-19 makes people more willing to "try anything" that might give them a sense of control of the situation, making them easy targets for scams.
