

Calorie Of An Orange

On September 10, 2003, Boylan was acquired by Emigrant Bank in conjunction with the private equity firm The Courtney Group. The acquisition was the first transaction in the beverage sector for both purchasers, and their first in New Jersey, where Boylan's headquarters were then located in Teterboro. As part of the transaction, Emigrant Capital executive-in-residence... 9cfaed630f Starting in 2016, Zevia introduced more products beyond its primary... 9cfaed630f

Coca-Cola Orange Diet Coke Orange, a no-calorie and sugarless version based on Diet Coke Coca-Cola Orange is a variation of Coca-Cola with orange flavoring. Laranja) for a limited time in the first half of 2017 in Brazil as a seasonal product. It is available on Coca-Cola Freestyle machines and has been released bottled periodically as limited editions in a number of markets, including in Coca-Cola Zero Sugar formulation 9cfaed630f

== Controversy == 9cfaed630f == History == 9cfaed630f According to genetic studies, the wild mandarin was one of the original citrus species; through breeding or natural hybridization, it is the ancestor of many hybrid citrus cultivars. With the citron and pomelo, it is the ancestor of the most commercially important hybrids. Though the ancestral mandarin orange was bitter, most commercial mandarin strains derive from hybridization with the pomelo, which gives them sweet fruit. 9cfaed630f Commercial orange juice with a long shelf life is made by pasteurizing the juice and removing the oxygen from it. This removes much of the taste, necessitating the later addition of a flavor pack, generally made from orange products. Additionally, some juice is further processed by drying and later rehydrating the juice, or by concentrating the juice and later adding water to the concentrate. 9cfaed630f The energy contents of a given mass of food is usually expressed in the metric (SI) unit of energy, the joule (J), and its multiple the kilojoule (kJ); or in the traditional unit of heat energy, the calorie (cal). In nutritional contexts, the latter is often (especially in US) the "large" variant of the unit, also written "Calorie" (with symbol Cal, both with capital "C") or "kilocalorie" (kcal), and equivalent to 4184 J or... 9cfaed630f Most animals derive most of their energy from aerobic respiration, namely combining the carbohydrates, fats, and proteins with oxygen from air or dissolved in water. Other smaller components of the diet, such as organic acids, polyols, and ethanol (drinking alcohol) may contribute to the energy input. Some diet components that provide little or no food energy, such as water, minerals, vitamins, cholesterol, and fiber, may still be necessary for health and survival for other reasons. Some organisms have instead anaerobic respiration, which extracts energy from food by reactions that do not require oxygen. 9cfaed630f Oranges, variously understood, have featured in human culture since ancient times. They first appear in Western art in the Arnolfini Portrait by Jan van Eyck, but they had been depicted in Chinese art centuries earlier, as in Zhao Lingrang... 9cfaed630f Before orange-flavored Coca-Cola was first launched in 2007 (although technically Coca-Cola Light Sango was the first orange-flavored cola), The Coca-Cola Company had already been selling the Mezzo Mix beverage in Germany since the 1970s, a drink with a similar formula to Coca-Cola Orange. It is available outside the Germany/Austria region on Freestyle fountains. 9cfaed630f

Mandarin orange In a reference amount of 100 g (3. 5 oz), a mandarin orange supplies 53 calories of food energy, and only A mandarin orange (Citrus reticulata), often simply called mandarin, is a small, rounded citrus tree fruit. The taste is sweeter and stronger than the common orange. negligible amounts of fat and protein (table). It can be grown in tropical and subtropical areas. The mandarin orange is tender and is damaged easily by cold. Hybrids have these traits to lesser degrees. A ripe mandarin orange is firm to slightly soft, heavy for its size, and pebbly-skinned. The mandarin is small and oblate, unlike the roughly spherical sweet orange (which is a mandarin-pomelo hybrid). The peel is thin and loose, with little white mesocarp, so they are usually easier to peel and to split into segments. Treated as a distinct species of orange, it is usually eaten plain or in fruit salads 9cfaed630f

Orange juice In American English, the beverage name is often abbreviated as OJ. It comes in several different varieties Orange juice is a primarily liquid extract of the orange tree fruit, produced by squeezing or reaming oranges. It comes in several different varieties, including blood orange, navel oranges, valencia orange, clementine, and tangerine. These vesicles contain the juice of the orange and can be left in or removed during the manufacturing process. As well as variations in oranges used, some varieties include differing amounts of juice vesicles, known as "pulp" in

American English, and "(juicy) bits" in British English. Orange juice is a primarily liquid extract of the orange tree fruit, produced by squeezing or reaming oranges. How juicy these vesicles are depend upon many factors, such as species, variety, and season 9cfaed630f

Boylan's first product was birch beer, based on a recipe formulated in 1891 in Paterson, New Jersey, by pharmacist Steven William Boylan. 9cfaed630f Diets based on negative-calorie food do not work as advertised but can lead to weight loss because they satisfy hunger by filling... 9cfaed630f The health value of orange juice is debatable: it has a high concentration of vitamin C, but also a very high concentration... 9cfaed630f Ron and Mark Fiorina's grandfather purchased the company from the Boylan family in the 1930s. From the late 1950s until 2001, the company was based in Haledon, New Jersey. Its facilities were then moved to Clifton, New Jersey, for a short time, before being relocated again to Moonachie, New Jersey, then to Teterboro, New Jersey, and, in 2013, to New York City. 9cfaed630f

Simply Beverages It makes several not-from-concentrate orange juices and other fruit juices that are sold refrigerated in a clear plastic bottle with a green twist top and large green seal. Simply Orange Juice Company) is an American fruit juice company based in Apopka, Florida that was founded on July 29, 2001 and is a brand of The Coca-Cola Simply Beverages (also known as the Simply Orange Juice Company) is an American fruit juice company based in Apopka, Florida that was founded on July 29, 2001 and is a brand of The Coca-Cola Company. The bottles have a wide body that starts tapering to a narrow neck at the top of the label 9cfaed630f

Food energy This is usually measured in calories or joules. This is usually measured in calories or joules. and muscular activity. Most animals derive most of their energy from aerobic respiration, namely combining Food energy is chemical energy that animals derive from food to sustain their metabolism and muscular activity 9cfaed630f

In May 2012, the product was the best selling soda in Whole Foods. By July 2013, it was the number seventeen zero-calorie or low-calorie soda in mainstream grocery stores, making it the only independent brand in the top 20. By the end of 2013, overall sales were over \$60 million, and it was the 14th-best-selling diet soda. By 2014 the firm's product was available in more than 16,000 stores in the United States, including Whole Foods, Target, Kroger, Safeway, Sprouts, and other grocery and natural food stores. 9cfaed630f In late 2013, the firm replaced their previous stevia and erythritol sweetener with a mix of stevia extract, monk fruit extract, and erythritol, a blend that they called SweetSmart. In September 2016, the company announced that all their products had been reformulated to be sweetened only with stevia. 9cfaed630f == History == 9cfaed630f

Zevia All Zevia products are zero-calorie, sugar-free, gluten free, vegan, certified kosher, and certified by The Non-GMO Project. In June 2021, Zevia filed to go public with an IPO. In June 2021, Zevia filed to go public with an IPO Zevia is a Los Angeles based company that produces soft drinks, organic tea, energy drinks, and mixers sweetened with stevia. zero-calorie, sugar-free, gluten free, vegan, certified kosher, and certified by The Non-GMO Project 9cfaed630f

The company was founded on July 29, 2001 by Minute Maid, launching three varieties of "Simply Orange" in the Northeastern United States: "Original", "Original with Calcium" and "Grove Made". By 2003, the company expanded to the Southeastern United States and achieved national distribution, adding a fourth variety "Country Stand with Calcium", and also "Minute Maid Simply Orange" was introduced in Canada by 2004. 9cfaed630f There is no evidence to show that any foods have a negative calorific impact. Foods claimed to be negative in calories are mostly low-calorie fruits and vegetables, notably celery, but also grapefruit, orange, lemon, lime, apple, lettuce, broccoli, and cabbage. However, celery has a thermic effect of around 8%, much less than the 100% or more required for a food to have "negative calories", unless the celery is frozen prior to consumption, however that would make it too hard to chew. 9cfaed630f == History == 9cfaed630f

Orange (fruit) The chloroplast genome, and therefore the maternal line, is that of pomelo. Botanically The orange, also called sweet orange to distinguish it from the bitter orange (*Citrus × aurantium*), is the fruit of a tree in the family Rutaceae. Botanically, this is the hybrid *Citrus × sinensis*, between the pomelo (*Citrus maxima*) and the mandarin orange (*Citrus reticulata*). The sweet orange has had its full genome sequenced.

Hybrids of the sweet orange form later types of mandarin and the grapefruit. The orange, also called sweet orange to distinguish it from the bitter orange (*Citrus × aurantium*), is the fruit of a tree in the family Rutaceae 9cfaed630f

== Regular version == 9cfaed630f The orange originated in a region encompassing Southern China, Northeast India, and Myanmar; the earliest mention of the sweet orange was in Chinese literature in 314 BC. Orange trees are widely grown in tropical and subtropical areas for their sweet fruit. The fruit of the orange tree can be eaten fresh or processed for its juice or fragrant peel. In 2024, 67 million tonnes of oranges were grown worldwide, with Brazil producing 23% of the total, followed by China and Mexico. 9cfaed630f

Valencia orange 9 to 7. has an average diameter of 2. 7 to 3 inches (69 to 76 mm; 6. It was first hybridized by pioneer American agronomist and land developer William Wolfskill in the mid-19th century on his farm in Santa Ana, southern California. 6 cm), and a piece of this fruit which weighs 96 grams (3. 4 oz) has 45 calories and The Valencia orange is a sweet orange cultivar named after the famed oranges in Valencia, Spain 9cfaed630f

== Etymology == 9cfaed630f The name mandarin orange... 9cfaed630f The company, Simply Orange, is a major buyer of Florida oranges for its orange juice but also imports orange juice from Brazil and Mexico. It uses a computer-modeled system to blend the juice sources for a uniform taste throughout the year. 9cfaed630f

Negative-calorie food claimed to be negative in calories are mostly low-calorie fruits and vegetables, notably celery, but also grapefruit, orange, lemon, lime, apple, lettuce A negative-calorie food is food that supposedly requires more food energy to be digested than the food provides. Despite its recurring popularity in dieting guides, there is no evidence supporting the idea that any food is calorically negative. Its thermic effect or specific dynamic action—the caloric "cost" of digesting the food—would be greater than its food energy content. While some chilled beverages are calorically negative, the effect is minimal and requires drinking very large amounts of water, which can be dangerous, as it can cause water intoxication 9cfaed630f

In 2006, the "Simply" line expanded with the launch of "Simply... 9cfaed630f

Boylan Bottling Company Boylan products are known for glass bottles with distinctive, retro style labels. The company's beverages use pure cane sugar and are bottled exclusively in glass. a low calorie version) Grape Lemon lime Orange Red birch beer Root beer (also available as a low calorie version) Seltzer Shirley Temple List of bottling Boylan Bottling Company is an American gourmet soft drink manufacturer located in New York City. The company was founded in Paterson, New Jersey, in 1891 9cfaed630f
