How to distinguish a spree killer from a mass murderer, or a serial killer, is subject to considerable debate, and the terms are... The general definition of spree murder is two or more murders committed by a person (or people) with no cooling-off period, in contrast to serial murder, where there is a period of time between killings. The U.S. Federal Bureau of Investigation (FBI) has found the category to be of no real value to law enforcement because quantifying a "cooling-off period" is arbitrary. Serial killers commit murders in separate events, at different times. Mass murderers are defined by one incident, with no distinctive period between the murders.

Organization and ranking of serial killings is made difficult by the complex nature of serial killers and incomplete knowledge of the full extent of many killers' crimes. To address this, multiple categories have been provided in order to more accurately describe the nature of certain serial murders. This is not a reflection of an individual's overall rank, which may or may not vary depending on personal opinion concerning the nature and circumstances of their crimes. The fourth column in the table states the number of victims definitely... This list shows all known serial killers from the 20th century to present day by number of victims, then possible victims, then date. For those from previous centuries, see List of serial killers before 1900. In many cases, the exact number of victims assigned to a serial killer is not known, and even if that person is convicted of

some, there can be the possibility that they killed many more.
