

Pulse Polio Immunization 2024

The WHO's stated purpose is to achieve the highest possible level of health for all the world's people, defining health as "a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity." The main functions of the World Health Organization include promoting the control of epidemic and endemic diseases; providing and improving the teaching and training in public health, the medical treatment of disease, and related matters; and promoting the establishment of international standards for biological products. 0987fe5a94 A vaccine is a biological preparation that improves immunity to a particular disease. A vaccine typically contains an agent that resembles a disease-causing microorganism, and is often made from weakened or killed forms of the microbe or its toxins. The agent stimulates the body's immune system to recognize the agent as foreign, destroy it, and "remember" it, so that the immune system can more easily recognize and destroy any of these microorganisms that it later encounters. 0987fe5a94

Health in India Being the world's most populous country and one of its fastest-growing economies, India experiences both challenges and opportunities in context of public health. 45 billion. barriers to immunization coverage are adverse geographic location, absent or inadequately trained health workers and low perceived need for immunization. India is a hub for pharmaceutical and biotechnology industries; world-class scientists, clinical trials and hospitals yet country faces daunting public health challenges like child undernutrition, neonatal and maternal mortality, rising non-communicable diseases, and road traffic accident cases. Infrastructure India's population in 2024 as per World Bank is 1 0987fe5a94

In 1992, Duque finished a post-graduate course on executive education Harvard School of Public Health. 0987fe5a94 The Human Rights Measurement Initiative finds that India is fulfilling 80.5% of what it should be fulfilling for the right to health based on its level of income. When looking at the right to health with respect to children, India achieves 92.1% of what is expected based on its current income. In regards to the right to health amongst the adult population, the country achieves only 85.6% of what is expected based on the nation's level of income. India falls into the "very bad" category when evaluating the right to reproductive health because the nation is fulfilling only 63.7% of what the nation is expected to achieve based on the resources (income) it has available. 0987fe5a94 == History == 0987fe5a94

Polio eradication and routine immunization with OPV or IPV elsewhere. Successful eradication of infectious diseases has been achieved twice before, with smallpox in humans and rinderpest in ruminants. Centers for Disease Control and Prevention (CDC) and The Gates Foundation, have spearheaded the campaign through the Global Polio Eradication Initiative (GPEI). Organization of "national immunization days" to provide supplementary doses of oral polio vaccine to Polio eradication, the goal of permanent global cessation of circulation of the poliovirus and hence elimination of the poliomyelitis (polio) it causes, is the aim of a

multinational public health effort begun in 1988, led by the World Health Organization (WHO), the United Nations Children's Fund (UNICEF) and the Rotary Foundation. These organizations, along with the U. S

Naresh Chander Lal He was awarded Padma Shri for his contribution in films and theater in 2016. natak) centering around various social concerns such as alcoholism, pulse polio immunization programme, AIDS, family planning, women empowerment, sanitation Naresh Chander Lal is an Indian film director and producer. He is the second person to receive the Padma Shri award from Andaman and Nicobar Islands

In 1987 Rotary International began a campaign to raise U.S. \$100 million by its 100th anniversary, for the purpose of dealing with global polio. The following year, the World Health Assembly voted for the Global Polio Eradication Initiative. At the time, there were 125 countries with endemic polio. Efforts were built upon those used to control wild poliovirus in the Americas in the early 1980s, and on lessons from smallpox eradication. Its first coordinator was Nick Ward.

Global Polio Eradication Initiative Region uses polio legacy to enhance overall immunization". "Africa eradicates wild poliovirus". October 10, 2023. "Data Monitoring". Global Polio Eradication The Global Polio Eradication Initiative is an initiative created in 1988, just after the World Health Assembly resolved to eradicate the disease poliomyelitis. Led by the World Health Organization, it is the largest international public health initiative in history

Prevention of disease spread is accomplished by vaccination. There are two kinds of polio vaccine—oral polio vaccine (OPV), which uses weakened poliovirus, and inactivated polio

vaccine (IPV), which is injected. OPV is less expensive and easier to administer, and can spread immunity beyond the person vaccinated, creating contact immunity. It has been the predominant vaccine used. However, under conditions of long-term vaccine virus circulation in under-vaccinated populations, mutations can reactivate the virus to produce a polio...

0987fe5a94 . This program led to a significant increase in coverage, up to 5%. The number of reported cases of polio also declined from thousands during 1987 to 42 in 2010. 0987fe5a94 Gandhi The Mahatma (Feature film) 0987fe5a94 The WHO was established on 7 April 1948, and formally began its work on 1 September 1948. It incorporated the assets, personnel, and duties of the League of Nations' Health Organization and the Paris-based Office International d'Hygiène... 0987fe5a94 In 1985, the Universal Immunization Programme (UIP) was launched to cover all the districts of the country. UIP became a part of child survival and safe motherhood program (CSSM) in 1992 and Reproductive and Child Health Program (RCH) in 1997 0987fe5a94 In the tables below, a brand might not be linked for one of two reasons: the brand name has neither an article or a redirect, or the brand name redirect points at the row's Vaccine Article (indicating no independent article). Some vaccines have been marked as 'discontinued' based on information in the target article. 0987fe5a94

Abhijit Banerjee Soon, the immunization rate went up in the region. In another Abhijit Vinayak Banerjee (Bengali pronunciation: [obʰid̪ʒit̪ binaɐ̯ɔk bɔ̃ɔpɔd̪ʱaɐ̯]; born 21 February 1961) is an Indian American economist who is currently the Ford Foundation International Professor of Economics at the Massachusetts Institute of Technology. " He and Esther Duflo are married, and became the sixth married couple to jointly win a Nobel or Nobel Memorial Prize on economic sciences. He is co-founder and co-director of the Abdul Latif Jameel Poverty Action Lab (J-PAL), an MIT based global research center promoting the use of scientific evidence to inform poverty alleviation strategies. In 2019, Banerjee shared the Nobel Memorial Prize in Economic Sciences with Esther Duflo and Michael Kremer, "for their experimental approach to alleviating global poverty. in Rajasthan, where they gave a bag of pulses to mothers who vaccinated their children 0987fe5a94

Pulse Polio [citation Pulse Polio is an immunisation campaign established by the government of India to eliminate poliomyelitis (polio) in India by vaccinating all children under the age of five years against the polio virus. The project fights polio through a large-scale, pulse vaccination programme and monitoring for poliomyelitis cases. World Health Organization (1988), India launched Pulse Polio immunization program with Universal Immunization Program which aimed at 100% coverage 0987fe5a94
