

Do Amoxicillin Cause Diarrhea

Common side effects include diarrhea, vomiting, and allergic reactions. It also increases the risk of yeast infections, headaches, and blood clotting problems. It is not recommended in people with a history of a penicillin allergy. It is relatively safe for use during pregnancy. 28d56aeb90 Common adverse effects include nausea and rash. It may also increase the risk of yeast infections, and when used in combination with clavulanic acid, diarrhea. It should not be used in those who are allergic to penicillin. While usable in those with kidney problems, the dose may need to be decreased. Its use in pregnancy and breastfeeding does not appear to be harmful. Amoxicillin is in the β -lactam family of antibiotics. 28d56aeb90

Azithromycin include nausea, vomiting, diarrhea and upset stomach. An allergic reaction, such as anaphylaxis, or a type of diarrhea caused by *Clostridioides difficile* 28d56aeb90

Amoxicillin Amoxicillin was discovered in 1958 and Amoxicillin is an antibiotic medication belonging to the aminopenicillin class of the penicillin family. Amoxicillin is in the β -lactam family of antibiotics. pregnancy and breastfeeding does not appear to be harmful. It is taken orally (swallowed by mouth), or less commonly by either intramuscular injection or by an IV bolus injection, which is a relatively quick intravenous injection lasting from a couple of seconds to a few minutes. The drug is used to treat bacterial infections such as middle ear infection, strep throat, pneumonia, skin infections, odontogenic infections, and urinary tract infections 28d56aeb90

Amoxicillin/clavulanic acid It is a combination consisting of amoxicillin, a β -lactam antibiotic, and potassium clavulanate, a β -lactamase inhibitor. Amoxicillin/clavulanic acid, also known as co-amoxiclav or amox-clav, sold under the brand names Augmentin, and Ranclav among others, is an antibiotic Amoxicillin/clavulanic acid, also known as co-amoxiclav or amox-clav, sold under the brand names Augmentin, and Ranclav among others, is an antibiotic medication used for the treatment of a number of bacterial infections. It is specifically used for otitis media, streptococcal pharyngitis, pneumonia, cellulitis, urinary tract infections, and animal bites. It can be administered orally or intravenously 28d56aeb90

Otitis media In those with frequent infections. The initial antibiotic of choice is typically amoxicillin. recommended in those who do not improve after two or three days 28d56aeb90

Shigellosis Symptoms generally start one to two days after exposure and include diarrhea, fever, abdominal pain. infection of the intestines caused by *Shigella* bacteria 28d56aeb90

Probiotics in children may also cause diarrhea to occur. Probiotics are considered generally safe to consume, but may cause bacteria-host interactions and unwanted side effects in rare cases. There is little evidence that probiotics bring the health benefits claimed for them. This illness can generally be accounted for by *Clostridioides*

difficile, a bacterium that can sometimes cause severe diarrhea. Probiotics are live microorganisms promoted with claims that they provide health benefits when consumed, generally by improving or restoring the gut flora. 28d56aeb90

Amoxicillin/clavulanic acid was approved for medical use in the United States in 1984. It is on the World Health Organization's List of Essential Medicines. The World Health Organization classifies amoxicillin/clavulanic acid as critically important for human medicine. It is available as a generic medication. In 2023, it was the 66th most commonly prescribed medication in the United States... 28d56aeb90 == Health effects == 28d56aeb90

Imipenem/cilastatin effects include nausea, diarrhea, and pain at the site of injection. Other side effects may include Clostridioides difficile diarrhea and allergic reactions. 28d56aeb90

Small intestinal bacterial overgrowth includes bloating, diarrhea, constipation, and abdominal pain/discomfort. Steatorrhea may be seen in more severe cases. SIBO can cause a variety of symptoms. 28d56aeb90

Cefditoren 5% with cefditoren vs. 0.2% differences in the percentages found for both compounds (4.1% for amoxicillin/clavulanic. 18% was diarrhea, with significant (P = 0.0001). 28d56aeb90

Pathogenic Escherichia coli has the ability to be very enterohemorrhagic like O157:H7, causing bloody diarrhea, but also is more enteroaggregative, meaning it adheres well and causes diarrhea. 28d56aeb90

Amoxicillin was discovered in 1958 and came into medical use in 1972. Amoxil was approved for medical use in the United States in 1974, and in the United Kingdom in 1977. It is on the World Health Organization's List of Essential Medicines. It is one of the most commonly prescribed... 28d56aeb90
