I (User:MattKingston) am in the process of creating a list of drugs and their various names. The list will be alphabetical and will use the following format (subject to change if better suggestions are put forward). a27c257664 Name of drug (who calls it that) [country]. Redirects to name of drug. a27c257664 Antimicrobial surfaces are functionalized in a variety of different processes. A coating may be applied to a surface that has a chemical compound that is toxic to microorganisms. In the alternative, it is possible to functionalize a surface by adsorbing a polymer or polypeptide and/or by changing its micro and nanostructure. a27c257664

Antimicrobial surface Such surfaces are becoming more widely investigated for possible use in various settings including clinics, industry, and even the home. The most common and most important use of antimicrobial coatings has been in the healthcare setting for sterilization of medical devices to prevent hospital-associated infections, which have accounted for almost 100,000 deaths in the United States. An antimicrobial surface is coated by an antimicrobial agent that inhibits the ability of microorganisms to grow on the surface of a material. Biotechnology Letters. In addition to medical devices, linens and clothing can provide a suitable environment for many bacteria, fungi, and viruses to grow when in contact with the human body which allows for the transmission of infectious disease.
