Probably a hybrid between the closely related *H. attenuatum* and *H. maculatum* (imperforate St. John's wort) that originated in Siberia, the species has spread worldwide. It can further hybridize with related species due to its allopolyploid nature. It is native to much of Europe, West and Central Asia, and parts of Africa and China and has been widely introduced elsewhere, thriving in well-drained, temperate habitats such as meadows, hillsides, and open woods with moderate rainfall and mild temperatures. It is a resilient, toxic, and invasive plant that reproduces sexually and vegetatively, supports specialized insect herbivores, suffers from plant diseases, and poses ecological and agricultural threats in many parts... 0932ceb83e

Gallium scan Gallium is particularly useful in imaging osteomyelitis that involves the spine, and in imaging older and chronic infections that may be the cause of a fever of unknown origin. As they are isotopic, Both 67Ga and 68Ga salts have the same uptake mechanisms. Due to lack of disease specificity, imaging with radioactive gallium(III) salts or complexes, such as 67Ga citrate, has gradually become less important over time and is rarely used these days. The gamma emission of gallium-67 is imaged by a gamma camera, while the positron emission of gallium-68 is imaged by positron emission tomography (PET). The gallium(III) is rapidly bound by transferrin, which then preferentially accumulates in tumors, inflammation, and both acute and chronic infection, allowing these pathological processes to be imaged. cases of biochemical recurrence of prostate cancer, particularly for patients with low PSA values, and in patients with high risk disease where metastases A gallium scan is a type of nuclear medicine diagnostic investigation that uses either a gallium-67 (67Ga) or gallium-68 (68Ga) radiopharmaceutical to obtain images of a specific type of tissue, or disease state of tissue. The form of salt is not important, since it is the freely dissolved gallium ion Ga³⁺ which is active. Gallium salts like gallium citrate and gallium nitrate may be used 0932ceb83e
