Menopause Natural menopause is the result of a decrease in the production of the hormones estrogen and progesterone. Natural menopause typically occurs between the ages of 45 and 55, although the exact timing can vary, occurring earlier or later for a variety of reasons.

Menopause before the age of 45 years is considered to be "early menopause", and ovarian failure or surgical removal of the ovaries before the age of 40 years is termed "premature ovarian insufficiency". Additionally a decrease in hormone levels can have other sources, including some types of chemotherapy. Women often notice symptoms of hormonal changes prior. Smoking cigarettes may result in an earlier menopause while having been pregnant may

The Aymara have lived in the region for over 7,250 years. In the late 15th century or early 16th century, Aymaras came under the rule of the Inca Empire and later of the Spanish Empire in the 16th century. Following the Spanish American wars of independence (1810-1825), the Aymara became subjects to the new nations of Bolivia and Peru. After the War of the Pacific (1879-1883), Chile annexed territory inhabited by the Aymara population.
