Although iron-based and copper-based SMAs, such as Fe-Mn-Si, Cu-Zn-Al and Cu-Al-Ni, are commercially available and cheaper than NiTi, NiTi-based SMAs are preferable for most applications due to their stability and practicability... The two most prevalent shape-memory alloys are copper-aluminium-nickel and nickel-titanium (NiTi), but SMAs can also be created by alloying zinc, copper, gold and iron. == History ==

VI (You Me at Six album) Ben Tipple of DIY called it a "reaffirmation of You Me At Six as a band, and a deliberate effort to reclaim. past glories to keep doing what they do best"

While the non-recorded history of Five-a-side is largely unknown, it is speculated that during the early 20th century the sport would originate. It would be noted that during this time, mainly in South America, football players would not be paid around the clock, nor in the offseason, so many players would be stuck in other jobs. They would create unofficial leagues with less players, thus dubbing a five-a-side game-mode. The spread to the rest of the world would come halfway through the century, when many South American players would be brought to Europe to play professionally. The small-scale sport would gain popularity quickly among European players...

Six Flags Magic Mountain In 1979, Six Flags purchased the park and added "Six Flags" to the park's name. Guitar strings may be plucked individually with a pick (plectrum) or fingertip, or strummed to play chords. Plucking a string causes it to vibrate at a fundamental pitch determined by the string's length, mass, and tension. (Overtones are also present, closely related to harmonics of the fundamental pitch.)

The string causes the soundboard and the air enclosed by the sound box to vibrate. As these have their... After the debut became an international success, Grohl recruited guitarist Pat Smear, bassist Nate Mendel, and drummer William Goldsmith to form the band's full lineup. The group convened in the fall of 1996 for pre-production on a second album, and brought in Gil Norton as producer to establish a pop sensibility for the tracks. The band strived to create a full-fledged rock record, contrary to music press predictions that it would be another grunge offshoot. With 17 operating roller coasters, Six Flags Magic Mountain is tied for second for the most coasters at any park, behind Energylandia in Zator, Poland and tied with other parks like Cedar Point and Canada's Wonderland. It became the first amusement park to offer 20 roller coasters with the opening of Wonder Woman: Flight of Courage in 2022. The 2025 removal of Superman: Escape from Krypton would put an end to this record, and it would stop being tied for first place after the closure of Magic Flyer in January 2026. In 2024, the park had an estimated 3.31 million visitors, ranking it 16th in attendance in North America.

Six Flags Great Adventure The park is located adjacent to Interstate 195, along Monmouth Road (County Route 537). Owned and operated by Six Flags, it includes an amusement park, a water park named Hurricane Harbor New Jersey, a safari park named Wild Safari Adventure, and a glamping resort named Savannah Sunset Resort and Spa. The complex first opened to the public in 1974 as simply Great Adventure, under the direction of restaurateur Warner LeRoy. The park was acquired by Six Flags in 1977. Hurricane Harbor New Jersey, an adjacent water park, was opened and added to Great Adventure in 2000. In 2012, Six Flags combined its 160-acre (65 ha) Great Adventure park with its 350-acre (140 ha) Wild Safari animal park to form Six Flags Great Adventure & Safari. The park is now the second-largest theme park in the world, following Disney's Animal Kingdom. In 1992, the park was renamed Adventure World after being acquired by Premier Parks. The park was rebranded as the tenth Six Flags park, after Premier Parks acquired Six Flags Inc., and adopted its name in 1999; the name-change to Six Flags America—and all associated IP and theming—was unveiled for the park's 1999 operating season. Following a 2024 merger between Six Flags and Cedar Fair, the park permanently closed on November 2, 2025, as part of the new Six Flags company's portfolio optimization program. Six Flags sold the park's 515-acre (208 ha) site to Thirty Five Ventures, a firm owned by Kevin Durant, and TPA Group in April 2026 in order to pay down... Parts made of shape-memory alloys can be lightweight, solid-state alternatives to conventional actuators such as hydraulic, pneumatic, and motor-based systems. They can also be used to make hermetic joints in metal tubing, and it can also replace a sensor-actuator closed loop to control water temperature by governing hot and cold water flow ratio.

Shape-memory alloy The "memorized geometry" can be modified by fixating the desired geometry and subjecting it to a thermal treatment, for example a wire can be taught to memorize the shape of a coil spring. metallurgy, a shape-memory alloy (SMA) is an alloy that can be deformed when cold but returns to its pre-deformed ("remembered") shape when heated. Dice Dice are used for generating random values, commonly as part of tabletop games, including dice games, board games, role-playing games, and games of chance. While the cubical six-sided die became the most common type in many parts of the world, other shapes were always known, like 20-sided dice in Ptolemaic A die (plural: dice, sometimes also used as singular) is a small, throwable object with marked sides that can rest in multiple positions
