Diarrhea It often lasts for a few days and can result in dehydration due to fluid loss. Diarrhea can be prevented by improved sanitation, clean drinking water, and Diarrhea (American English), also spelled diarrhoea (British English), is the condition of having at least three loose, liquid, or watery bowel movements in a day. This can progress to decreased urination, loss of skin color, a fast heart rate, and a

decrease in responsiveness as it becomes more severe. Signs of dehydration often begin with loss of the normal stretchiness of the skin and irritable behaviour. In most cases, stool cultures to confirm the exact cause are not required. Loose but non-watery stools in babies who are exclusively breastfed, however, are normal
