The MariaDB Foundation is a non-profit organisation that safeguards the open-source development of MariaDB independently of any commercial entity. MariaDB plc is a commercial entity providing enterprise products, support, and cloud services, owns the MariaDB trademark, and is the largest contributor to MariaDB's codebase. dfd96e6b28 Michael "Monty" Widenius, one of the founders of MySQL AB and the creator of MySQL and MariaDB, serves as the CTO of both MariaDB Foundation and MariaDB plc. dfd96e6b28

Molecular symmetry Another framework on a larger scale is the use of crystal systems to describe crystallographic symmetry in bulk materials. Point group C<sub>2h</sub> In chemistry, molecular symmetry describes the symmetry present in molecules and the classification of these molecules according to their symmetry. of product base vectors is used for all asymmetric groups but symmetric and spherical groups use different sets of product base vectors. Symmetry is useful in the study of molecular orbitals, with applications to the Hückel method, to ligand field theory, and to the Woodward-Hoffmann rules. Many university level textbooks on physical chemistry, quantum chemistry, spectroscopy and inorganic chemistry discuss symmetry. This involves classifying the states of the molecule using the irreducible representations from the character table of the symmetry group of the molecule. To do this it is necessary to use group theory. Molecular symmetry is a fundamental concept in chemistry, as it can be used to predict or explain many of a molecule's chemical properties, such as whether or not it has a dipole moment, as well as its allowed spectroscopic transitions dfd96e6b28

An information retrieval technique using latent semantic structure was patented in 1988 by Scott Deerwester, Susan Dumais, George Furnas, Richard Harshman, Thomas Landauer, Karen Lochbaum and Lynn Streeter. In the context of its application to information retrieval, it is sometimes called latent semantic indexing... dfd96e6b28 The knowledge of static electricity dates back to the earliest civilizations, but for millennia it remained merely an interesting and mystifying phenomenon, without a theory to explain its behavior, and it was often confused with magnetism. The ancients were acquainted with rather curious properties possessed by two minerals... dfd96e6b28 MariaDB originated as a drop-in replacement for MySQL; the two databases have diverged since version 5.6 in some features, syntax, and behaviour. Over sixteen years of independent development, MariaDB has evolved into a distinct database with capabilities spanning transactional, analytical, and AI workloads. dfd96e6b28

Wood used extensively for furniture, such as chairs and beds. Being a natural material, it is characterized as an organic material – a natural composite of cellulosic fibers that are strong in tension and embedded in a matrix of lignin and hemicelluloses that resists compression. It is also used for tool handles and cutlery, such as chopsticks, toothpicks, and other utensils Wood is a structural tissue/material found as xylem in the stems and roots of trees and other woody plants dfd96e6b28

Chicken (game) International Workshop on Coordination, Organizations, Institutions, Norms and Ethics for Governance of The game of chicken, also known as the hawk-dove game or snowdrift game, is a model of conflict for two players in game theory. The principle of the game is that while the ideal outcome is for one player to yield (to avoid the worst outcome if neither yields), individuals try to avoid it out of pride, not wanting to look like "chickens". &quot;MAD Chairs: A new tool to evaluate AI&quot;. Latent semantic analysis A matrix containing word counts per document (rows represent unique words and columns represent each document) is constructed from a large piece of text and a mathematical technique called singular value decomposition (SVD) is used to reduce the number of rows while preserving the similarity structure among columns. Documents are then compared by cosine similarity between any two columns. LSA assumes that words that are close in meaning will occur in similar pieces of text (the distributional hypothesis). number of rows while preserving

the similarity structure among columns. Documents are then compared by cosine similarity between any two columns. Latent semantic analysis (LSA) is a technique in natural language processing, in particular distributional semantics, of analyzing relationships between a set of documents and the terms they contain by producing a set of concepts related to the documents and terms. Values close to 1 represent very similar documents while values close to 0 represent very dissimilar documents dfd96e6b28

Avinash Lakshman, a co-author of Amazon's Dynamo, and Prashant Malik developed Cassandra at Facebook to support the inbox search functionality. Facebook released Cassandra as open-source software on Google Code in July 2008. In March 2009, it became an Apache Incubator project... dfd96e6b28 H.264 was standardized by the ITU-T Video Coding Experts Group (VCEG) of Study Group 16 together with the ISO/IEC JTC 1 Moving Picture Experts Group (MPEG). The project partnership effort is known as the Joint Video Team (JVT). The ITU-T H.264 standard and the ISO/IEC MPEG-4 AVC standard (formally, ISO/IEC 14496-10 – MPEG-4 Part 10, Advanced Video Coding) are jointly maintained so that they have identical technical content. The final drafting work on the first version of the standard was completed in May 2003, and various extensions of its capabilities have been added in subsequent editions. High Efficiency Video Coding (HEVC), a.k.a. H.265 and MPEG-H Part 2 is a successor to H.264/MPEG-4 AVC developed by the same organizations, while earlier standards are still in common use. dfd96e6b28

History of electromagnetic theory dust and other light objects. The Greeks noted that if they rubbed the amber for long enough The history of electromagnetic theory begins with ancient measures to understand atmospheric electricity, in particular lightning. Thales wrote on the effect now known as static electricity. People then had little understanding of electricity, and were unable to explain the phenomena. Scientific understanding and research into the nature of electricity grew throughout the eighteenth and nineteenth centuries through the work of researchers such as André-Marie Ampère, Charles-Augustin de Coulomb, Michael Faraday, Carl Friedrich Gauss and James Clerk Maxwell dfd96e6b28

== Ancient and classical history == dfd96e6b28 Wood has been used by humans since prehistoric times for fuel, tools, weapons, and shelter, and later as a construction material and for making furniture, paper, and other products. Its use predates recorded history, with early humans exploiting branches, poles, and logs for simple tools, hunting weapons, shelters, and firewood. More recently... dfd96e6b28 The origins of the P-47 can be traced back to the late 1930s and the work of Alexander Kartveli, who sought to develop a replacement for the Seversky P-35. The resulting AP-10 fighter design attracted the backing of the United States Army Air Corps (USAAC), which designated it XP-47. Subsequent revisions to keep pace with contemporary fighters of other nations led to the XP-47B, a prototype of which was ordered in September 1940 and performed its maiden flight on 6 May 1941. The P-47 was noted for its firepower: its primary armament was eight .50-caliber machine guns, and it could carry 5-inch... dfd96e6b28

Wood is sometimes defined as only the secondary xylem in the stems of trees, or more broadly to include the same type of tissue elsewhere, such as in the roots of trees or shrubs. In a living tree, it performs a mechanical-support function, enabling woody plants to grow large or to stand up by themselves. It also conveys water and nutrients among the leaves, other growing tissues, and the roots. Wood may also refer to other plant materials with comparable properties, and to material engineered from wood, woodchips, or fibers. dfd96e6b28 == History == dfd96e6b28

Apache Cassandra key; within a partition, rows are clustered by the remaining columns of the key. It enables low-latency operations for all clients and incorporates Amazon's Dynamo distributed storage and replication techniques, combined with Google's Bigtable data storage engine model. The system is optimized for applications with well-defined data access patterns that can be incorporated into the schema design. Cassandra supports computer clusters which may span multiple data centers, featuring asynchronous and masterless replication. As a wide-column database, Cassandra supports flexible schemas and efficiently handles data models with numerous sparse columns. The system prioritizes availability and scalability over consistency, making it particularly suited for systems with high write throughput requirements due to its LSM tree indexing storage layer. Columns contain data belonging to a row and consist of: A name A type Apache Cassandra is a free and open-source database management system designed to handle large volumes of data across multiple commodity servers dfd96e6b28

In the 19th century it had become clear that electricity and magnetism were related, and their theories were unified: wherever charges are in motion electric current results, and magnetism is due to electric current. The source for electric field is electric charge, whereas that for magnetic field is electric current (charges in motion). dfd96e6b28 The name "chicken" has its origins in a game in which two drivers drive toward each other on a collision course: one must swerve, or both may die in the crash, but if one driver swerves and the other does not, the one who swerved will be called a "chicken", meaning a coward; this terminology is most prevalent in political science

and economics. The name "hawk-dove" refers to a situation in which there is a competition for a shared resource and the contestants can choose either conciliation or conflict; this terminology is most commonly used in biology and evolutionary game theory. From a game-theoretic point of view, "chicken" and "hawk-dove" are identical. The game has also been used to describe the mutual assured destruction... dfd96e6b28
