Cannabis cultivation Cultivation techniques for other purposes (such as hemp production) differ. all cannabis products in a regulated market must be grown in the state where they are sold because federal law continues to ban interstate cannabis sales The cultivation of cannabis is the production of cannabis infructescences ("buds" or "leaves") 50cc98f785

Unlike other species of the genus, *C. ruderalis* enters the flowering stage based on the plant's maturity rather than its light cycle. With *C. sativa* and *C. indica* varieties, the plant

stays in the vegetative state indefinitely as long as a long daylight cycle is maintained. Cannabis geneticists today refer to this feature as "autoflowering... 50cc98f785 This species is smaller than other species of the genus, rarely growing over 0.61 metres (2 feet) in height. The plants have "thin, slightly fibrous stems" with little branching. The foliage is typically open with large leaves. *C. ruderalis* reaches maturity much quicker than other species of Cannabis, typically 5–7 weeks after being planted from seed. 50cc98f785

Cannabis in Australia On 24 February 2016, Australia legalised growing of cannabis for medicinal. used cannabis in their lifetime and 11. 5% had used cannabis in the last 12 months 50cc98f785

Cannabis This taxonomic interpretation was embraced by Cannabis aficionados who commonly distinguish. *ruderalis* is short, branchless, and grows wild in Central Asia 50cc98f785

Cannabis in India Cannabis in India has been thought to be used at least as early as 2000 BCE though linguistic evidence demonstrates that it may not have been used until 50cc98f785

Cannabis and sports The use of cannabis by athletes has been banned by many sports commissions. However, some have relaxed their policies as societal attitudes towards its 50cc98f785

Cannabis and religion In ancient history some religions used cannabis as an entheogen, particularly in the Indian subcontinent where the. cannabis, historically and presently 50cc98f785

Occupational diseases, including asthma, are an emerging concern in the rapidly expanding U.S. cannabis industry. Cannabis cultivation and processing technicians may be exposed to numerous respiratory hazards, e.g. organic particulate matter and dust from ground cannabis flower, mold, bacterial endotoxins, and pesticides. Employees exposed to ground cannabis without adequate controls are at risk of developing occupational asthma which can be fatal. 50cc98f785
