

Which Is Not A Computer Classification

Handheld computers, also called personal digital assistants (PDA), are battery-powered computers small enough to carry almost anywhere. Although not as powerful as desktops or laptops, handhelds are useful for scheduling appointments, storing addresses and phone numbers, and playing games. Some have more advanced capabilities, such as making accessing the Internet. Instead of keyboards, handhelds have touch screens that you use with your finger or a stylus (a pen- shaped pointing tool).
