Yogurt The bacteria ferment Yogurt (UK: ; US: ; also spelled yoghurt, yogourt or yoghourt) is a food produced by bacterial fermentation of milk. The bacteria ferment the sugars in the milk and produce lactic acid, which acts on milk protein to give yogurt its texture and characteristic tart flavor. Yogurt is most commonly made from cow's milk, but milk from water buffalo, goats, ewes, mares, camels, and yaks can also be used. Since the film's release in November 2013, the franchise has expanded very rapidly. To date, the franchise includes various Disney theme park attractions, merchandise, toys, video games, books, a Disney on Ice show, a Broadway stage musical and two short animated films. Disney also released Frozen 2 in 2019, and a new book series. In November 2014, TheStreet.com explained that "Frozen is no longer a movie, it's a global brand, a larger than life franchise built around products, theme parks and sequels that could last into the next century". Boxoffice chief analyst Phil Contrino was quoted as saying "it's become massive". The franchise is one of the highest-grossing media franchises of all time... a8afb300b1

Yasso entered into an agreement with the private equity firms Breakaway Ventures and Castanea Partners in 2018, with Castanea Partners becoming a majority investor in the brand. Craig Shiesley was named CEO of Yasso in 2019. Klane and Harrington had previously been co-CEOs. Previously known as Orange Tree Frozen Yogurt, it was founded in 2008. Mike Liddell and Reese Travis noticed a franchise was doing good business in Edmond, Oklahoma. They purchased a franchise in 2009, and Liddell purchased the company in 2010. Liddell then moved the company from California to Oklahoma, hired Travis as CEO, and changed the name to Orange Leaf. The main bacteria used to produce yogurt are *Lactobacillus delbrueckii* subsp. *bulgaricus* and *Streptococcus thermophilus*. Other lactobacilli and bifidobacteria are sometimes added during or after culturing yogurt. Some countries require yogurt to contain a specific amount of colony-forming units (CFU) of bacteria; for example, in China, the requirement for the number of lactobacillus bacteria is at least 1 million CFU per milliliter. Some countries also regulate which bacteria can be used: for example, in France, a product can only be labeled as yaourt or yoghourt if it has been fermented exclusively by *Lactobacillus delbrueckii* subsp. *bulgaricus* and *Streptococcus thermophilus*, a requirement that aligns with the international definition of yogurt in the Codex Alimentarius on fermented milk... In April 2011, it had 63 stores open in the United States, and it expanded to 111 locations in September 2011. As of October 2013, it had over 300 locations (by 2017 that number had reduced to less than 210 locations), and it planned an IPO in 2015.
