From the 17th century until the mid-19th century, the central role of agriculture and slavery during the colonial period and antebellum era economies stratified society by land ownership. This landed gentry differentiated culture in the early Southern United States from areas north of the Mason–Dixon line and west of the Appalachians. The upland areas of the South were characterized by yeoman farmers who worked on their small landed property with few or no enslaved people, while the lower-lying elevations and Deep South were societies of more plantations worked by African slave labor. Events such as the First Great Awakening (1730s–1750s) would strengthen Protestantism in the South and United States as a whole. Communities... Various "typical" or "traditional" breakfast menus exist, with food choices varying by regions and traditions worldwide. The word in English refers to breaking the fasting period of the previous night

== History == In Old English, a regular morning meal was called *morgenmete*, and the word *dinner*, which originated from Gallo-Romance *desjunare* ("to break one's fast"), referred to a meal after fasting. Around the mid-13th century, that meaning of *dinner* faded away, and around the 15th century "breakfast" came into use in written English to describe a morning meal. == Overview == Some writers include choline as a vitamin. A purpose that is imposed by human use, such as the purpose of a fork to hold food, is called

extrinsic. Natural teleology, common in classical philosophy, though controversial today, contends that natural entities also have intrinsic purposes, regardless of human use or opinion. For instance, Aristotle claimed that an acorn's intrinsic telos is to become a fully grown oak tree. Though ancient materialists rejected the notion of natural teleology, teleological accounts of non-personal or non-human nature were explored and often endorsed in ancient and medieval philosophies, but fell into disfavor during the modern era (1600–1900). 1e6ff286b8 == Literature == 1e6ff286b8 Historically, Cajuns are the descendants of the Acadian exiles who went to Louisiana (especially to Acadiana) in the decades after le grand dérangement. Clues in the videos point to Georges' childhood memories, and his resistance to his parents' adopting an Algerian orphan named Majid, who was sent away 1e6ff286b8

Shortages related to the COVID-19 pandemic Many commercial and governmental operations curtailed or suspended operations, leading to shortages across "non-essential" services. How COVID, chicken sandwich war and chicken wing demand are impacting restaurants". Tyko K (6 May 2021). One response was to improvise around shortages, producing supplies ranging from cloth masks to diagnostic tests to ventilators in home workshops, university laboratories, and rapidly repurposed factories. For example, many health care providers stopped providing some

surgeries, screenings, and oncology treatments. In some cases, governmental decision making created shortages, such as when the CDC prohibited the use of any diagnostic test other than the one it created. Initially, extreme shortages emerged in the equipment needed to protect healthcare workers, diagnostic testing, equipment and staffing to provide care to seriously ill patients, and basic consumer goods disrupted by panic buying. “Is there a chicken shortage. Shot in Paris and Vienna in 2004, the film is an international co-production of France, Austria, Germany and Italy. Haneke wrote the screenplay with Auteuil and Binoche in mind, and with a concept of exploring guilt and childhood. When he learned of the French government's decades-long denial of the 1961 Seine River massacre, he incorporated memories of the event into his story. While Lower Louisiana had been settled by French colonists since the late 17th century, many Cajuns trace their roots to the influx of Acadian settlers after the Great Expulsion from their homeland during the French and British hostilities prior to the French and Indian War (1756 to 1763). Most Acadians can trace their ancestry to approximately 50 families who were living in Port Royal, Acadia, now Annapolis Royal, Nova Scotia, in 1671. The Acadia region to which many modern Cajuns trace their origin consisted largely of what are now Nova Scotia, New Brunswick, Prince Edward Island plus parts of eastern Quebec and northern Maine. Thermostats are used in any device or system that heats or cools to a setpoint temperature. Examples include building heating, central heating, air conditioners, HVAC systems, water heaters, as well as kitchen equipment including ovens and refrigerators and medical and scientific incubators. In scientific literature, these devices are often broadly classified as thermostatically controlled loads (TCLs). Thermostatically controlled loads comprise roughly 50% of the overall electricity demand in the United States. The word thermostat is derived from the Greek words θερμός thermos, "hot" and στατός statos, "standing, stationary".
