Well over 200 virus strains are implicated in causing the common cold, with enteroviruses (especially rhinoviruses), coronaviruses, and adenoviruses being the most common. They spread through the air or indirectly through contact with objects in the environment, followed by transfer to the mouth or nose. Risk factors include going to child care facilities, not sleeping well, and psychological stress. The symptoms are mostly due to the body's immune response to the infection rather than to tissue destruction by the viruses themselves. The symptoms... 71711049bf

Common cold Signs and symptoms may appear in as little as two days after exposure to the virus. These may include coughing, sore throat, runny nose, sneezing, headache, fatigue, and fever. Ipratropium may also help with coughs in adults. The The common cold, or simply a cold, is a viral infectious disease of the upper respiratory tract that primarily affects the respiratory mucosa of the nose, throat, sinuses, and larynx. Occasionally, those with other health problems may develop pneumonia. Ipratropium nasal spray may reduce the symptoms of a runny nose but has little effect on stuffiness. People usually recover in seven to ten days, but some symptoms may last up to three weeks. When general symptoms are systemic and the disease is severe, the term "flu-like" or "influenza-like illness" can be used instead 71711049bf

List of VeggieTales characters role of a stuffy, classically educated British "gentleman" in contrast with the rest of his zany co-stars. He typically wears a red bowtie, has a monocle 71711049bf
