Chewing gum is a type of gum made for chewing, and dates back at least 5,000 years. Chewing gum is a type of gum made for chewing, This is a list of chewing gum brands in the world. This list contains both chewing gum and bubblegum. By the 1960s, chicle was replaced by butadiene-based synthetic rubber which is cheaper to manufacture. Modern chewing gum was originally made of chicle, a natural latex 9405cc8401

By around 2020, Stride had reduced its product range to a single flavor, Spearmint, and was mainly sold online through Amazon and eBay. Since then, the brand's availability in physical retail stores has gradually decreased. In 2023, Mondelez sold most of its chewing gum operations to Perfetti Van Melle to focus on its core chocolate and biscuit brands, though Stride was excluded from the deal. The following year, in 2024, Mondelez discontinued Stride sales in the United States, Canada, and Europe, when the final batch of Spearmint gum was produced. The brand still continues to be offered in China and Australia. 9405cc8401 == Uses == 9405cc8401

Kauri gum Kauri forests once covered much of the North Island of New Zealand, before early settlers caused the forests to retreat, causing several areas to revert to weeds, scrubs, and swamps. Even afterwards, ancient kauri fields and the remaining forests continued to provide a source for the gum. Fresh gum was used as a type of chewing gum (older gum was softened by soaking and mixing Kauri gum is resin from kauri trees (*Agathis australis*), which historically had several important industrial uses. The Māori had many uses for the gum, which they called kapia. Between 1820 and 1900, over 90% of Kauri forests were logged or burnt by Europeans. It can also be used to make crafts such as jewellery 9405cc8401

For almost a century, the Wrigley Company continuously marketed three brands of gum: Wrigley's Spearmint, Doublemint, and Juicy Fruit. Since the late 20th century, it has expanded and created multiple more brands. Wrigley's became a subsidiary of Mars Inc. in 2008, and, along with Mars chocolate bars and other candy products, makes up "Mars Wrigley Confectionery" (now Mars Snacking). 9405cc8401 According to 2025 Circana market data, The PUR Company Inc. is the fastest-growing gum brand in the United States among brands with more than 1 million units

sold. 9405cc8401 Nicotine gum and other NRT products... 9405cc8401

5 (gum) 5 is a brand of sugar-free chewing gum that is manufactured by the Wrigley Company, marketed toward teenagers. The name "5" hints at the five human senses (with the ad slogans "Stimulate Your Senses" and "How It Feels to Chew Five Gum") and that it has 5 calories. The name "5" hints at the five human senses 5 is a brand of sugar-free chewing gum that is manufactured by the Wrigley Company, marketed toward teenagers 9405cc8401

Chewing gum Chewing gum is a soft, cohesive substance designed to be chewed without being swallowed. Its texture is reminiscent of rubber because of the physical-chemical properties of its polymer, plasticizer, and resin components, which contribute to its elastic-plastic, sticky, chewy characteristics. Modern chewing gum is composed of gum base, sweeteners, softeners/plasticizers, flavors, colors, and, typically, a hard or powdered polyol coating. Modern chewing gum is composed of gum base, sweeteners, softeners/plasticizers Chewing gum is a soft, cohesive substance designed to be chewed without being swallowed 9405cc8401

The Orbit brand was reintroduced 30 years later in 1976, when it was introduced in Germany, Switzerland and The Netherlands. This marked the first time that a sugar-free gum was marketed under the Wrigley name. The brand was later introduced in many other countries around the world. In the US, Orbit launched in 1977 but ran into trouble because of its xylitol... 9405cc8401 Kauri gum forms when resin from kauri trees leaks out through fractures or cracks in the bark, hardening upon exposure to air. Lumps commonly fall to the ground and can be covered with soil and forest litter, eventually fossilising. Other lumps form as branches forked or trees are damaged, releasing the resin. 9405cc8401 Wrigley marketed an Orbit gum in 1940s in the United States as a replacement brand by Wrigley due to rationing of gum-making ingredients in World War II. The brand was discontinued after the war ended, when Wrigley's three established gum brands, Juicy Fruit, Wrigley's Spearmint and Doublemint, returned to the US market. 9405cc8401 == Composition == 9405cc8401 5 gum was introduced in the United States in March 2007, in Canada in January 2008, in Russia, Europe and Australia in 2009, and in China, India, Italy, the Middle East, Egypt, Thailand, and Malaysia in 2010. When introduced to new markets, 5 would be stylized and branded as "New 5 Gum". 9405cc8401

Stride (gum) Stride is a brand of sugar-free chewing gum introduced in June 2006 by Cadbury-Adams and owned by Mondelez International, sold in packs of 14 pieces. By Stride is a brand of sugar-free chewing gum

In modern chewing gum, if natural rubber such as chicle is used, it must pass several purity and cleanliness tests. However, most modern types of chewing gum use synthetic gum-based materials and chemicals such as sugar and artificial flavoring chemicals. These materials allow for longer lasting flavor, a softer texture, and a reduction in tackiness. Polyol and Xylitol are two carbohydrate sugars that are used in the production of bubble gum and chewing gum. Rubbers are one additive that are in both bubble gum and chewing gum; however, the components of the rubber in the bubble gum are larger in mass than in chewing gum. 9405cc8401 Nicotine gum is available via general, pharmaceutical, and online sales without the need for a prescription. Flavor options range from mint and cinnamon to various fruit flavors, and doses range from 2-6 mg, though it is most commonly sold in 2 and 4 mg strengths. Common side effects include mouth irritation or ulcers, jaw pain, and hiccups. Although nicotine in tobacco products is associated with increased cardiovascular risk, hyperlipidemia, and increased insulin resistance, there is insufficient evidence to demonstrate that nicotine found in nicotine gum has the same health effects. The Food and Drug Administration (FDA) states that nicotine is the addictive chemical in tobacco, but that the mix of thousands of chemicals in tobacco and tobacco smoke, rather than nicotine, is what causes serious disease and death in tobacco users. 9405cc8401 The Orbit name in chewing gums dates back to the early 20th century. It was made as Orbit Listerated Gum, by the Common Sense Co. (later known as Listerated Gum Corp.). The Orbit trademark went to Wrigley when it bought Listerated Gum Corp in 1925. 9405cc8401
