by the Education Bureau in 2007), and its framework was revised by the Education Bureau in 2008. The USDA's first nutrition guidelines were published in 1894 by Dr. Wilbur Olin Atwater as a farmers' bulletin. In Atwater's 1904 publication titled Principles of Nutrition and Nutritive Value of Food, he advocated variety, proportionality and moderation; measuring calories; and an efficient, affordable diet that focused on nutrient-rich foods and less fat, sugar and starch. On 13 October 2010, Chief Executive Donald Tsang stated in the "Policy Address 2010-2011" that moral and national education would replace MCE to "strengthen national education". The government planned to introduce the new subject in primary schools in 2012 and secondary schools in 2013, and carried out a four-month consultation in 2011. Following the opposition from the public, the government postponed the commencement of the subject indefinitely.

In Japan, primary education is prescribed by Japanese curriculum guidelines (gakushū shidō yōryō). Since the 1970s, the Japanese government has gradually reduced the amount of class time and the contents given in the guideline, and this tendency is called yutori education. However, in recent

years, notably after the 2011 earthquake, this has been a controversial issue. A 2024 study by Bai and Tanaka reported that individuals who experienced more years under the relaxed education system had lower earnings, and were less likely to hold full-time or skilled employment in adulthood. 5415a3a5cf In addition to the programming language, Kemeny and Kurtz developed the Dartmouth Time-Sharing System (DTSS), which allowed multiple users to edit and run BASIC programs simultaneously on remote terminals. This general model became popular on minicomputer systems like the PDP-11 and Data General Nova in the late 1960s and early 1970s. Hewlett-Packard produced an entire computer line for this method of operation, introducing the HP2000 series in the late 1960s and continuing sales into the 1980s. Many early video games trace their history to one of these versions of BASIC. 5415a3a5cf
