In one chapter, he describes an impromptu experiment in which he showed how the O-rings in the shuttle's rocket boosters could have failed due to cold temperatures on the morning of the launch. Later, this failure was determined to be the primary cause of the shuttle's destruction. Gastrointestinal stromal tumors are rare tumors with malignant potential. Primary lymphomas can occur in the appendix. Breast cancer, colon cancer, and tumors of the female genital tract may metastasize to the appendix. 2e1f6efd4a According to the unrestricted comprehension principle, for any sufficiently well-defined property, there is the set of all and only the objects that have that property. Let R be the set of all sets that are not members of themselves (sometimes called "the Russell set"). If R is not a member of itself, then its definition entails that it is a member of itself; yet, if it is a member of itself, then it is not a member of itself, since it is the set of all sets that are not members of themselves. The resulting contradiction is Russell's paradox. Sometimes these decisions and the relevant documents also encompass decisions around other critical or life-prolonging medical interventions. Smith CB, Bunch O'Neill L (October 2008).
