Opioid epidemic in the United States The third wave, starting in 2013, was marked by a steep tenfold increase in the synthetic opioid-involved death rate as synthetic opioids flooded the US market. The second wave was from an expansion in the heroin market to supply already addicted people. The opioid epidemic unfolded in three waves. The first wave of the epidemic in the United States began in the late 1990s, according to the Centers for Disease Control and Prevention (CDC), when opioids were increasingly prescribed for pain management, resulting in a rise in overall opioid use throughout subsequent years. It has been described by doctors and researchers as "one of the most devastating public health catastrophes of our time". study on the concoction of codeine with alcohol or soda, also known as "purple drank," reported that codeine is most widely used in a recreational way by men There is an ongoing opioid epidemic (also known as the opioid crisis) in the United States, originating out of both medical prescriptions and illegal sources 0036504ef1

0036504ef1 The West was the last area in the United States to be reached during the gradual westward expansion of settlement by English speakers and its history shows considerable mixing and leveling of the linguistic patterns of other regions. Therefore, since the settlement populations are relatively young when compared with other regions, the American West continues to be a dialect region in formation. According to the 2006 Atlas of North American English, as a very broad generalization, Western U.S. accents are differentiated from Southern U.S. accents in maintaining /aɪ/ as a diphthong, from Northern U.S. accents by fronting /u/ (the GOOSE vowel), and from both by consistently showing the low back merger (the merger of the vowel sounds in words like cot and caught). Furthermore, in speakers... 0036504ef1
