

# Cold Syrup For Child

Gambia cough syrup scandal Promethazine Oral Solution, Kofexmalin Baby Cough Syrup, Makoff Baby Cough Syrup, and Magrip N Cold Syrup. [excessive citations] Indian authorities started The Gambia cough syrup scandal refers to the deaths of 70 children in The Gambia from the consumption of four cough syrups manufactured in India. The four products were Promethazine Oral Solution, Kofexmalin Baby Cough Syrup, Makoff Baby Cough Syrup, and Magrip N Cold Syrup. In October 2022, the World Health Organization issued a medical product alert asking regulators to remove Maiden Pharmaceuticals' products from the market 59790ac321

India is a leading global drug producer, but the quality of some locally marketed medicines has been questioned after previous tragedies. In 2022-2023, dozens of children in Uzbekistan, the Gambia and Cameroon died after taking Indian-made syrups contaminated with ethylene glycol or diethylene glycol. For example, 18 children in Uzbekistan died after ingesting Dok-1 Max, and WHO later found toxic glycols in syrups from India's Marion Biotech. Similarly, a WHO... 59790ac321 There have been poisonings in Haiti, Bangladesh, Indonesia, Marshall Islands,

Pakistan, Panama, The Gambia, India (twice), Uzbekistan, and Cameroon between 1992 and 2022, due to contaminated cough syrup and other medications that incorporated inexpensive diethylene glycol instead of glycerine. 59790ac321

Indian authorities started investigating an April 2023 allegation that a pharmaceutical regulator in Haryana state, who holds a senior position in the state health department, accepted a bribe and switched samples of contaminated cough syrup before the state government laboratory tested them. Maiden Pharmaceuticals produced the cough syrup in question, and it has been implicated in child deaths in Gambia. The bribery allegation indicates that Maiden Pharmaceuticals had foreknowledge that their cough syrup was tainted. Tests conducted by two independent laboratories on behalf of the WHO confirmed the presence of lethal toxins—ethylene glycol and diethylene glycol in the syrup. Indian authorities, however, did not find any toxins but did identify labeling issues... 59790ac321

2025 India cough syrup crisis Similarly, a WHO investigation attributed dozens of child deaths in the Gambia to four Indian cough syrups contaminated In late 2025, India experienced a deadly outbreak of cough syrup poisoning that primarily struck children in the central state of Madhya Pradesh and the neighbouring state of Rajasthan. in syrups from India's Marion Biotech. Investigations showed that at least one of the implicated syrups, Coldrif, produced by Sresan Pharmaceuticals, contained extremely high levels of the industrial solvent diethylene glycol (DEG). The World Health Organization also issued global alerts about the contaminated syrups. Dozens of young children fell ill and many died after taking locally sold cough medicines. Another incident in Rajasthan involved a government-distributed cough syrup containing the active ingredient dextromethorphan hydrobromide made by Kayson Pharma

On December 22, the sale and distribution of Dok-1 Max was temporarily suspended in Uzbekistan, followed by the complete ban of Marion-produced cough syrups one week later. Uzbek customs officials prevented the distribution of 60,000 boxes of Dok-1 Max in response to the new regulations. In late December, the Indian government also ordered the company's manufacturing plant in Noida, Uttar Pradesh to shutdown production and on January 10, 2023, it suspended Marion's license to conduct business. 59790ac321 Shavkat Mirziyoyev, the current President of Uzbekistan... 59790ac321
