

Bleeding After Intercourse No Pain

Regular monthly vaginal bleeding during the reproductive years, menstruation, is a normal physiologic process. During the reproductive years, bleeding that is excessively heavy (menorrhagia or heavy menstrual bleeding), occurs between monthly menstrual periods (intermenstrual bleeding), occurs more frequently than every 21 days (abnormal uterine bleeding), occurs too infrequently (oligomenorrhea), or occurs after vaginal intercourse (postcoital bleeding) should be evaluated. a642c63ce3

Sex after pregnancy sexual activity-related complication after childbirth. Since there are no guidelines on resuming sexual intercourse after childbirth, the postpartum patients a642c63ce3

Sexual intercourse having sexual intercourse after a surgery. The desire for these activities is grounded in natural human instinct and they involve physical intimacy between two or more people, usually enacted by humans solely for physical-emotional pleasure, sometimes contributing to human bonding. This specific type of sex is also known as vaginal intercourse (or vaginal sex). Obstacles that those with disabilities face with regard to engaging in sexual intercourse include pain, depression Sex, more formally known as sexual intercourse, coitus, or copulation, is an intimate social activity typically involving the insertion of the erect male penis inside the female vagina and followed by thrusting motions for erotic pleasure, biological reproduction, or both. However, other forms of penetrative sexual intercourse also exist, including anal sex (penetration of the anus by the penis), oral sex (penetration of the mouth by the penis or oral contact with or penetration of the female genitalia), fingering (sexual penetration by the fingers) and penetration by use of a dildo (especially a strap-on dildo), and vibrators a642c63ce3

Ovarian apoplexy intraperitoneal bleeding. Clinical symptoms of apoplexy associated with the basic mechanism of this disease: Pain, which occurs primarily mid-cycle or after a minor a642c63ce3

Treatment depends on the underlying cause. Options may include hormonal birth control, gonadotropin-releasing hormone...

Bleeding After Intercourse No Pain

A diagnosis to determine the cause will include obtaining a medical history... Some women will bleed after intercourse for the first time but others will not. The hymen may bleed if it is stretched since it is thin tissue. Other activities may have an effect on the vagina such as sports and tampon use. Postcoital bleeding may stop without treatment. In some instances, postcoital bleeding may resemble menstrual irregularities. Postcoital bleeding may occur throughout pregnancy.

Cervicitis Cervicitis may have no symptoms. If symptoms do manifest, they may include: Abnormal vaginal bleeding after intercourse after periods Unusual gray,

The presence of cervical polyps may result in postcoital bleeding during pregnancy because the tissue of the polyps is more easily damaged. Postcoital bleeding can be due to trauma after consensual and non-consensual sexual intercourse. The bleeding can be from the uterus, cervix, vagina and other tissue or organs located near the vagina. Postcoital bleeding can be one of the first indications of cervical cancer. There are other reasons why vaginal bleeding may occur after intercourse.

Postcoital bleeding Though some causes are with associated pain, it is Postcoital bleeding (PCB) is non-menstrual vaginal bleeding that occurs during or after sexual intercourse. Postcoital bleeding (PCB) is non-menstrual vaginal bleeding that occurs during or after sexual intercourse. Though some causes are with associated pain, it is typically painless and frequently associated with intermenstrual bleeding

Hymen Minor injuries to the. or tear during first penetrative intercourse, which usually results in pain and, sometimes, mild temporary bleeding or spotting

Abnormal uterine bleeding Quality of life may be negatively affected. The term "dysfunctional uterine bleeding" was used when no underlying cause was present. menstrual cycles, after sexual intercourse or bleeding after six months of menopause Premenopausal menstrual bleeding that stops for more than 3

Bleeding After Intercourse No Pain

months Abnormal uterine bleeding is vaginal bleeding from the uterus that is abnormally frequent, lasts excessively long, is heavier than normal, or is irregular a642c63ce3

Vaginal bleeding This bleeding may originate from the uterus, vaginal wall, or cervix. days (abnormal uterine bleeding), occurs too infrequently (oligomenorrhea), or occurs after vaginal intercourse (postcoital bleeding) should be evaluated Vaginal bleeding is any expulsion of blood from the vagina. Generally, it is either part of a normal menstrual cycle or is caused by hormonal or other problems of the reproductive system, such as abnormal uterine bleeding a642c63ce3

There are different views on what constitutes sexual intercourse or other sexual activity, which can impact views of sexual health. Although sexual intercourse, particularly the term coitus, generally denotes penile-vaginal penetration and the... a642c63ce3 The causes of abnormal vaginal bleeding vary by age, and such bleeding can be a sign of specific medical conditions ranging from hormone imbalances or anovulation to malignancy (cervical cancer, vaginal cancer or uterine cancer). In young children, or elderly adults with cognitive impairment, the source of bleeding may not be obvious, and may be from the urinary tract (hematuria) or the rectum rather than the vagina, although... a642c63ce3

Squamous cell carcinoma of the vagina A mass or. is vaginal bleeding, often in women who have already gone through menopause and no longer have monthly periods or after sexual intercourse a642c63ce3

The underlying causes may be structural or non-structural and are classified in accordance with the FIGO system 1 & 2. Common causes include: Ovulation problems, fibroids, the lining of the uterus growing into the uterine wall, uterine polyps, underlying bleeding problems, side effects from birth control, or cancer. Susceptibility to each cause is often dependent on an individual's stage in life (prepubescent, premenopausal, postmenopausal). More than one category of causes may apply in an individual case. The first step in work-up is to rule out a tumor or pregnancy. Vaginal bleeding during pregnancy may be abnormal in certain circumstances. Please see Obstetrical bleeding and early pregnancy bleeding for more information. Medical imaging or hysteroscopy may help with the diagnosis. a642c63ce3
