Nurse anesthetist (DNAP) or doctor of nursing practice (DNP) degree. In comparison, an anesthesiologist is a physician (medical doctor) who has undergone residency training A nurse anesthetist is an advanced practice nurse who administers anesthesia for surgery or other medical procedures. In some localities, nurse anesthetists provide anesthesia to patients independently; in others they do so under the supervision of physicians. They are involved in the administration of anesthesia in a majority of countries, with varying levels of autonomy, which may include some or all anesthesia services before, during, and after surgery. The International Federation of Nurse Anesthetists was established in 1989 as a forum for developing standards of education, practice, and a code of ethics. They are also concerned with patient advocacy, safety and professional development eacc6193ad
