

Aadhaar Enabled Public Distribution System

== Early life... == 24e5320d94 Antyodaya Anna Yojana (AAY) ration cards are issued to the "poorest of poor" households. Each AAY household is entitled to 35 kilograms of food grain per month. 24e5320d94

Facial recognition system process, with Aadhaar-based facial recognition". ThePrint. Retrieved February 12, 2022. Such a system is typically employed to authenticate users through ID verification services, and works by pinpointing and measuring facial features from a given image. April 6, 2021. "Despite Privacy Fears, Aadhaar-Linked Facial Recognition A facial recognition system is a technology potentially capable of matching a human face from a digital image or a video frame against a database of faces 24e5320d94

More broadly, welfare may also encompass efforts to provide a basic level of well-being through subsidized social services such as healthcare, education, infrastructure, vocational training, and public housing. In a welfare state, the state assumes responsibility for the health, education, infrastructure and welfare of society, providing a range of social services such as those described. 24e5320d94 The term "India Stack" was coined by iSPIRT, a technology industry think tank co-founded by Sharad Sharma in 2013. iSPIRT positioned the branding to describe separate government systems as a unified, exportable model of digital public infrastructure (DPI). Despite the branding, each component (Aadhaar under UIDAI, UPI under NPCI, DigiLocker under MeitY, ABDM under NHA) is closed-source and separately governed. 24e5320d94

Iris recognition Its major limitation is that image acquisition from distances greater than a meter or two, or without cooperation, can be very difficult. The discriminating powers of all biometric technologies depend on the amount of entropy they are able to encode and use in matching. Iris recognition is exceptional in this regard, enabling the avoidance of "collisions" (False Matches) even in cross-comparisons across massive populations. Aadhaar programme as of December 2022) have been enrolled in iris recognition systems for national ID, e-government services, benefits distribution, Iris recognition is an automated method of biometric identification that uses mathematical pattern-recognition techniques on video images of one or both of the irises of an individual's eyes, whose complex patterns are unique, stable, and can be seen from some distance. However, the technology is in development and iris recognition can be accomplished from even up to 10 meters away or in a live camera feed 24e5320d94

Priority Household (PHH) ration cards are issued to households that meet the eligibility criteria set by their state government. Each priority household is entitled to 5 kilograms of food grain per member per month. 24e5320d94

Aadhaar India's adult population had been issued an Aadhaar, making it the world's largest biometric ID system A new Aadhaar app, which replaced the former mAadhar Aadhaar is a twelve-digit unique identity number that can be obtained voluntarily by all residents of India based on their place of residence, biometrics and demographic data. The data is collected by the Unique Identification Authority of India (UIDAI), a statutory authority established in January 2016 by the Ministry of Electronics and Information Technology, following the provisions of the Aadhaar Act, 2016 24e5320d94

Biometrics The Electronic Journal of Information Systems in Developing Countries. 84 (6) e12053. It is also used to identify individuals in groups that are under surveillance. Infrastructures: A Critical Realist Case Study of India's Aadhaar Project",. Biometric authentication (or realistic authentication) is used in computer science as a form of identification and access control. doi:10 Biometrics are body measurements and calculations related to human characteristics and features 24e5320d94

Reetika Khera Reetika Khera is an Indian development economist. Aadhaar-enabled Exclusion and Corruption, Deccan Herald, 27 November 2016. Khera is Professor (Economics) at the Indian Institute of Technology, Delhi (IIT Delhi). Nadu welfare schemes: Reetika Khera, Catch News, 7 December 2016. She was Associate Professor (Economics and Public Systems group) at the Indian Institute of Management, Ahmedabad (IIM Ahmedabad) from 2018-20 24e5320d94

UIDAI officials claim that Aadhar have the... 24e5320d94 Reetika Khera received a B.A. in economics from Maharaja Sayajirao University of Baroda, an M.A. in economics from the Delhi School of Economics, University of Delhi and an M.Phil. in development studies from the Institute of Development Studies at the University of Sussex in Brighton, England. Khera completed a Ph.D. in economics at the Delhi School of Economics. She did her schooling from Convent of Jesus and Mary, Baroda. 24e5320d94 == Early life and education == 24e5320d94 While initial DBT implementation has solved certain delivery issues and met some of its objectives, it has created a new set of concerns to be dealt with. For the successful implementation of DBT, beneficiaries were made aware of the importance of creating and keeping a bank account. Nationwide financial literacy and financial inclusion schemes such as PM's Jan Dhan Yojana (PM's People's Wealth Scheme) launched in August 2014 and the JAM Yojana, that is the bank-mobile-identification trinity, were started to this effect. Literacy and social issues also impact the beneficiary. Tracking deposits, reading SMS notifications, knowing the correct amount of money that is owed, ensuring that the correct amount has been deposited, and mobility are some... 24e5320d94 The second child of India's longest-serving chief justice, Y. V. Chandrachud, he was educated at Delhi University and Harvard University and has practised as a lawyer for Sullivan & Cromwell and in the Bombay High Court. 24e5320d94

Welfare spending pensions), as opposed to social assistance programs which provide support on the basis of need alone (e. g. Additional welfare measure systems are also uniquely operated by various state governments. most disability benefits). Social security may either be synonymous with welfare, or refer specifically to social insurance programs which provide support only to those who have previously contributed (e. The International Labour Organization defines social security as covering support for those in old age, support for the maintenance of children, medical treatment,

parental and sick leave, unemployment and disability benefits, and support for sufferers of occupational injury. The government uses the Aadhaar system to distribute welfare measures Welfare spending is a type of government support intended to ensure that members of a society can meet basic human needs such as food and shelter. g 24e5320d94

Retinal scanning is a different, ocular-based biometric technology that uses the unique patterns on a person's retina blood vessels and is often confused with iris recognition. Iris recognition uses video camera technology with subtle near infrared illumination to acquire images of the detail-rich, intricate structures of the iris which are visible externally... 24e5320d94 Under the NFSA, all state governments in India have to identify households that are eligible to receive subsidised food grain from the Public Distribution System and provide them with ration cards. There are two types of ration cards under NFSA: 24e5320d94 Development on similar systems began in the 1960s as a form of computer application. Since their inception, facial recognition systems have seen wider uses in recent times on smartphones and in other forms of technology, such as robotics. Because computerized facial recognition involves the measurement of a human's physiological characteristics, facial recognition systems are categorized as biometrics. Although the accuracy of facial recognition systems as a biometric technology is lower than iris recognition, fingerprint image acquisition, palm recognition or voice recognition, it is widely adopted due to its contactless process. Facial recognition systems have been deployed in advanced human-computer interaction, video surveillance, law enforcement, passenger screening, decisions on employment and housing, and automatic indexing of images. 24e5320d94 Applicants to Aadhaar receive an Aadhaar UID Card used to identify a resident of India. However, following a series of Supreme Court rulings and provision of the Aadhar Act, it is not considered proof of Indian citizenship, domicile, address, date of birth, and age. It cannot be used as an identification document for international travel. 24e5320d94 She has received fellowships from the Institute for Economic Growth, the Commonwealth Scholarship Scheme, King's College London, and from Princeton University (for a project with Nobel laureate Sir Angus Deaton). 24e5320d94 Biometric identifiers are the distinctive, measurable characteristics used to label and describe individuals. Biometric identifiers are often categorized as physiological characteristics which are related to the shape of the body. Examples include, but are not limited to fingerprint, palm veins, face recognition, DNA, palm print, hand geometry, iris recognition, retina, odor/scent, voice and shape of ears. Behavioral characteristics are related to the pattern of behavior of a person, including but not limited to mouse movement, typing rhythm, gait, signature, voice, and behavioral profiling. Some researchers have coined the term "Behaviometrics" (behavioral biometrics) to describe the latter class of biometrics. 24e5320d94

India Stack government-operated digital public infrastructure systems in India. The term encompasses identity verification (Aadhaar), payments (UPI), document storage India Stack is a collection of government-operated digital public infrastructure systems in India. The term encompasses identity verification (Aadhaar), payments (UPI), document storage (DigiLocker), and data sharing layers—each governed by separate government bodies with distinct legal frameworks 24e5320d94

The systems within the India Stack have achieved significant scale, with UPI processing over 10 billion monthly transactions and Aadhaar covering 1.4 billion residents. India Stack has been credited with supporting India's digital economy, financial inclusion, and e-government initiatives. It has also faced criticism regarding welfare exclusion linked to biometric authentication failures, and concerns around privacy, consent, and digital divide. 24e5320d94

Ration card (India) They also serve as a common form of identification for many Indians. "eINDIA 2012 » INDIA'S LARGEST ICT EVENT » Aadhaar Enabled Public Distribution System – Civil Supplies Department, Government of Andhra Pradesh" Ration cards are an official document issued by state governments in India to households that are eligible to purchase subsidised food grain from the Public Distribution System under the National Food Security Act (NFSA). June 2016 24e5320d94

A new Aadhaar app, which replaced the former mAadhar app, was launched on 28 January 2026. This app allows users to digitally show, share, and verify their identity selectively, rather than tendering copies of their physical ID or quoting the unique number itself. 24e5320d94

Dhananjaya Y. Chandrachud He was appointed a judge of the Supreme Court of India in May 2016. He has also previously served as the chief justice of the Allahabad High Court from 2013 to 2016 and as a judge of the Bombay High Court from 2000 to 2013. He also served as the ex-officio Patron-in-Chief of the National Legal Services Authority and the de facto Chancellor of the National Law School of India University. World Bank chief economist Paul Romer described Aadhaar as "the most sophisticated Dhananjaya Yeshwant Chandrachud (born 11 November 1959) is a retired Indian jurist, who served as the 50th Chief Justice of India from 9 November 2022 to 10 November 2024. India enacted the Aadhaar Act, which is the world's largest biometric ID system 24e5320d94

Direct Benefit Transfer This scheme or program aims to establish a Giro system to transfer subsidies directly to the people through their linked bank accounts. It is hoped that crediting subsidies into bank accounts will reduce leakages, duplicity and delay and the new processes will increase transparency and accountability. Enabled by the Jan Dhan, Aadhaar, and Mobile (JAM) trio. It utilizes core banking and electronic Direct Benefit Transfer or DBT is an attempt to change the mechanism of transferring subsidies launched by Government of India on 1 January 2013. at Gollaprolu in East Godavari district on 6 January 2013 24e5320d94

Facial recognition systems... 24e5320d94 As of May 2023, more than 99.9% of India's adult population had been issued an Aadhaar, making it the world's largest biometric ID system 24e5320d94 More traditional means of access control include token-based identification systems, such as a driver's license or passport, and knowledge-based identification systems, such... 24e5320d94 == Origin of the term == 24e5320d94 Some historians view systems of codified almsgiving, like the zakat policy... 24e5320d94 "One Nation, One Ration Card" is an Aadhaar-based national ration card portability scheme to ensure food security for all, including internal migrants within India, under which beneficiaries can purchase subsidised food anywhere in India. For example, a migrant worker can obtain his share... 24e5320d94 He has been part of benches that delivered landmark judgements such as the electoral bond scheme verdict, 2019

Supreme Court verdict on Ayodhya dispute, privacy verdict, decriminalisation of homosexuality, Sabarimala case, same-sex marriage case and on revocation of the special status of Jammu and Kashmir. He has visited the universities of Mumbai, Oklahoma, Harvard, Yale and others as a professor. 24e5320d94
