Area code 807 The numbering plan area (NPA) Area code 807 is a telephone area code in the North American Numbering Plan (NANP) for the Canadian province of Ontario. The numbering plan area (NPA), comprising only Northwestern Ontario, was created in early 1962 in an area code split of NPA 705. -90 Area code 807 is a telephone area code in the North American Numbering Plan (NANP) for the Canadian province of Ontario. The main reason for the split was not central office prefix exhaustion, but routing efficiency for calls from Western Canada to northwestern Ontario bae9af6d08

The Illinois side of the Chicago area-312/773/872, 708/464, 847/224, 630/331 and portions of 815/779-is one of the largest local calling areas in the United States; with few exceptions, no long-distance charges are applied from one portion of the metro area to another... bae9af6d08 Due to West Virginia's low population, the state still needed only one area code in the early 21st century. With the growth of telecommunication services, in particular proliferation of cell and mobile phones and fax machines, news reports in 2007 indicated that West Virginia would soon need a new area code. bae9af6d08 Area code 503 was used for the entire state of Oregon until November 5, 1995, when the numbering plan area was reduced to just the populous northwestern corner of the state, including Portland and Salem, and area code 541 began service for the rest of the state. The dividing line ran east and south of Portland. bae9af6d08

Area code 250 Area code 250 is a telephone area code in the North American Numbering Plan (NANP) for the Canadian province of British Columbia outside the Lower Mainland Area code 250 is a telephone area code in the North American Numbering Plan (NANP) for the Canadian province of British Columbia outside the Lower Mainland, including Vancouver Island - home to the provincial capital, Victoria - and the province's Interior region. The incumbent local exchange carriers that service the area code are Telus, Northwestel, and CityWest in the city of Prince Rupert. In addition, the numbering plan area extends into the United States community of Hyder, Alaska, located along the Canada-United States border near the town of Stewart bae9af6d08

Area code 319 was assigned to the eastern part, and stretched along the entire border with Wisconsin and Illinois. By the end of the 20th century, the available telephone number pool was depleting rapidly because of the increase in mobile devices, demand for telephone lines for computer equipment, FAX machines, and other services. In late 2000 it was announced that a new area code 563 would be assigned to northeastern Iowa. Cell phone service providers advocated an overlay plan, so that it would not require reconfiguration of all cell phones in the area.

However, the Illinois Commerce Commission implemented a series of conservation measures that staved off the need for a new area code. By 2008, a combination of population growth and a large growth in cell phone usage forced the implementation of 872. bae9af6d08 Major cities in the numbering plan area (NPA) include Burlington, Cedar Falls, Cedar Rapids, Oelwein, Fort Madison, Iowa City, Keokuk, Mount Pleasant, and Waterloo. bae9af6d08 When the first nationwide numbering plan was implemented in 1947, despite its relatively low population, Iowa was divided into three numbering plan areas (NPAs), with each border line running roughly in north-south directions. bae9af6d08 In 2001, the North American Numbering Plan Administrator (NANPA) projected that demand would exhaust the numbering pool of area code 208 in 2003. The number shortage was a result of the proliferation of landlines, cellphones, and pagers, particularly in urban areas, in the 1990s. However, in 2002 the Idaho Public Utilities Commission (IPUC) successfully delayed a split... bae9af6d08 This was intended as a long-term solution, as northwest Oregon contains most of Oregon's population, and with it the great majority of Oregon's landlines and cell phones. However, by 2007, 541 was quickly exhausting central office codes, due to the proliferation... bae9af6d08

== Service area == bae9af6d08 Prior to the implementation of the code, there was debate over whether the 563 code should have been implemented as a split, or overlaid over the existing 319 code. Mobile phone providers were in favor of the overlay, as a split would have required en masse reprogramming of cell phones. However, at the time, overlays were still a new concept that met with considerable public resistance (due to requirements for 10-digit dialing and mixing of area codes in the same area). It was ultimately decided to use a geographical split instead. bae9af6d08 == History == bae9af6d08

Because of its small population, Idaho was among a declining number of North American jurisdictions with only one area code. It is also one of the few whole-state area codes split between multiple LATAs—Southern Idaho (centered in Boise and spilling into Nevada, Wyoming and Malheur County, Oregon) and Coeur d'Alene (spilling into Montana and Washington). Additionally, the Spokane, Washington LATA spills into central Idaho. bae9af6d08 On January 29, 2008, the West Virginia Public Service Commission voted to split numbering plan area 304, while commission chairman dissented in favor of an overlay. The proposed split had Charleston, Parkersburg and points south (Huntington, Bluefield, Beckley) staying with area code 304, while the northern and eastern

portions of the state (Wheeling, Morgantown, Martinsburg, Clarksburg) would have received a new area code. Telecommunications service providers were also in favor of an overlay. They wanted to spare their northern West... bae9af6d08
