Black pepper is one of the most commonly traded spices in the world. Its spiciness is due to the chemical compound piperine, which is a different kind of spiciness from that of capsaicin characteristic of chilli peppers. It is ubiquitous in the Western world as a seasoning and is often paired with salt and available on dining tables in shakers or mills. 693d171d84 == Views on religion == 693d171d84
