Principles of grouping Gestalt psychologists argued that these principles exist because the mind has an innate disposition to perceive patterns in the stimulus based on certain rules. [citation needed] The principles of similarity and proximity often work together to form a Visual Hierarchy. The German term Gestalt in psychological contexts means shape, pattern, configuration. only by color. These principles are organized into five categories: Proximity, Similarity, Continuity, Closure, and Connectedness. Either principle can dominate The principles of grouping (or Gestalt laws of grouping) are a set of principles in psychology, first proposed by Gestalt psychologists to account for the observation that humans naturally perceive objects as organized patterns and objects, a principle known as Prägnanz 566a92535d

The use of texture, in conjunction with other design elements, can convey a In the visual arts, texture refers to the perceived surface quality of a work of art. It is an element found in both two-dimensional and three-dimensional designs, and it is characterized by its visual and physical properties 566a92535d

Design elements 566a92535d Arts and crafts 566a92535d The role of the graphic designer in the communication process is that of the encoder or interpreter of the message. They work on the interpretation, ordering, and presentation of visual messages. In its nature, design pieces can be philosophical, aesthetic, emotional and political. Usually, graphic design uses the aesthetics of typography and the compositional arrangement of the text, ornamentation, and imagery to convey ideas, feelings, and attitudes beyond what language alone expresses. The design work can be based on a customer's demand, a demand that is established linguistically, either orally or in writing; that is, graphic design transforms a linguistic message into a graphic manifestation. 566a92535d == Proximity == 566a92535d Irvin Rock and Steve Palmer, who are acknowledged as having built upon the work of Max Wertheimer and others and to have identified additional grouping principles, note that Wertheimer's laws have come to be called the "Gestalt laws of grouping" but state that "perhaps a more appropriate description" is "principles of grouping." Rock and Palmer helped to further Wertheimer's research to explain human perception of groups of objects and how whole objects are formed from parts which are perceived. 566a92535d Hue, saturation, and brightness are the three characteristics that describe color. 566a92535d

Decollage 566a92535d == Line == 566a92535d == Color == 566a92535d Lines are marks moving in a space between two points whereby a viewer can visualize the stroke movement, direction, and intention based on how the line is oriented. Lines describe an outline, capable of producing texture according to their length and curve. There are different types of lines artists may use, including, actual, implied, vertical, horizontal, diagonal and contour lines, which all have different functions. Lines are also situational elements, requiring the viewer to have knowledge of the physical world in order to understand their flexibility, rigidity, synthetic nature, or life. 566a92535d Graphic design, as a field of application, encompasses... 566a92535d == Principles == 566a92535d Color is the result of light reflecting back from an object to our eyes. The color that our eyes perceive is determined by the pigment of the object itself. Color theory and the color wheel are often referred to when studying color combinations in visual design. Color is often deemed to be an important element of design as it is a universal language which presents the countless possibilities of visual communication. Color serves various purposes to contribute to the overall effectiveness of the design. It is used as an element to convey meaning and emotion, create visual hierarchy, enhance brand identity, improve readability and accessibility, create visual interest and appeal, differentiate information and elements, and make cultural and contextual significance. 566a92535d

This style of communication relies on the way one's brain perceives outside images. These images come together within the human brain making it as if the brain is what is actually viewing the particular image. Visual communication has been proven to be unique when compared to other verbal or written languages because of its more abstract structure. It stands out for its uniqueness, as the interpretation of signs varies on the viewer's field of experience. The brain then tries to find meaning from the interpretation. The interpretation of imagery is often compared to the set alphabets and words used in oral or written languages. Another point of difference found by scholars is that, though written or verbal languages are taught, sight does not have to be learned and therefore people of sight may lack awareness of visual communication and its influence in their everyday life. Many of the visual elements listed above are forms of visual communication... 566a92535d Design, as a verb, it refers to the process of originating and developing a plan for a new object (machine, building, product, etc.). As a noun, it is used both for the final plan or proposal (a drawing, model, or other description), or the result of implementing that plan or proposal... 566a92535d Ceramic art 566a92535d Animation 566a92535d

Graphic design Graphic design is an interdisciplinary branch of design and of the fine arts.
