The latter's unclassified nature was a boon for the Soviets and resulted in many superficial and functional similarities between American and Soviet shuttle designs. Although the Buran orbiter was similar in appearance to NASA's Space Shuttle orbiter, and could similarly operate as a re-entry spaceplane, its final internal and functional design was different. == Career == 2620ff4840 The Consequence Argument is a philosophical argument for the incompatibility of free will and determinism. The argument was most notably introduced by philosopher Peter van Inwagen in an article titled "The Incompatibility of Free Will and Determinism" (1975). According to van Inwagen, if determinism is true, then a complete description of the past together with the laws of nature is enough to determine the truth of any proposition. It follows that the truth of any proposition,

given determinism, is never such that anything we do could make a proposition true or false. In a later work of his, van Inwagen would state the argument succinctly, 2620ff4840

If the above reasoning is correct, then compatibilism is false. The argument is, however, neutral with respect to the truth of hard determinism or libertarian free will. Adherents of either side often defend this argument... 2620ff4840 The title of the album stands for the real music. The main goal in life for Rebel is to develop himself as a person and as a musician. Ever since he was a child, he's been living with the feeling that real music is slowly dying. He grew up in the 90s, he felt:"I only survived because 9 was 6 to me. I have to stop caring so much maybe, and let people enjoy their plastic music, but i can't."I hope some DJs decide to sell their MP3 players and buy a guitar. I also hope that singers realize that autotune or melodyne really doesn't teach you how to sing better. I also hope that live bands will stop with their tapes that are playing during the show. I hope the kids of the future realize what happened to music in the last 30 years and eventually save the real music". 2620ff4840 Rebel was born on January 24, 1991, in Den Haag. His parents played in socialist music groups and choirs (Verenigde Oost Nederlandse Kompanjie, also known as VONK) with which they also performed demonstrations against racism, nuclear energy, and weapons. At a fairly young age, Rebel moved 1993 from Den Haag to Baarn. Despite the distance, the family went to Hengelo every Sunday to rehearse. Rebel was allowed to hang out at VONK every Sunday, which was an important factor in his career as a musician. The socialist nature of VONK, including their frequent appearances at demonstrations and playing of protest songs such as The Internationale influenced his music crucially. This becomes apparent in the topics that Tuinstra frequently writes about; humanity, equality, anti-racism, gender equality, and tolerance are recurring themes of his songs. He feels that there... 2620ff4840 == Background == 2620ff4840 == Biography == 2620ff4840

These steps, it is argued, will lead to the creation of a functioning market system by converting the previous state enterprises to operate under market pressures as state-owned commercial enterprises. 2620ff4840 "If determinism is true, then our acts are the consequences of the laws of nature and events in the remote past. But it is not up to us what went on before we were born, and neither is it up to us what the laws of nature are. Therefore, the consequences of these things (including our present acts) are not up to us. 2620ff4840
