

Dates In Palm Trees

The area of the current Vincenti gardens was used for the cattle... The 19th-century project to enlarge the old St. Joseph's field by the architect Alejandro Sesmero, which was not finally carried out, was the basis for the development of a park which over the years would become the Palm Trees Park. In Christianity, the palm branch is associated with Jesus' Triumphal Entry into Jerusalem, celebrated on Palm Sunday, when the Gospel of John says of the citizens, "they took palm branches and went out to meet Him" (12:13 HCSB). Additionally, the palm has meaning in Christian iconography, representing victory, i.e. the victory of the spirit over the flesh (Revelation 7:9). Palms are among the best known and most extensively cultivated plant families. They have been important to humans throughout much of history, especially in regions like the Middle East and North Africa. A wide range of common products and foods are derived from palms. In contemporary times, palms are also widely used in landscaping. In many historical cultures, because of their importance as food, palms were symbols for such ideas as victory, peace, and fertility... Throughout the 20th century, the area of the current Palm Trees Park was subject to continuous changes, both in terms of landscaping and the elements it contained.

Palm Trees Park It is the most representative and emblematic green area in the city centre, together with the Alameda de Pontevedra. The Palm Trees Park, also known simply as Las Palmeras or As Palmeiras, is a public park in the heart of Pontevedra in Spain. It is the most representative The Palm Trees Park, also known simply as Las Palmeras or As Palmeiras, is a public park in the heart of Pontevedra in Spain

== History ==

The Palm Tree, Mile End The Palm Tree is a Grade II listed public house at 127 Grove Road, Mile End, and is within Mile End Park. It was built in 1935 for Truman's Brewery and

== Land classification == Date palms reach up to 30 metres (98 ft) in height, growing singly or in clumps with several stems from a single root system. Slow-growing, they can reach over 100 years of age when maintained properly. Their born fruit (dates) are oval-cylindrical, 3 to 7 centimetres (1 to 3 inches) long, and about 2.5 cm (1 in) in diameter, with colour ranging from dark brown to bright red or yellow, depending on variety. Containing 63–64% sugar by mass when dried, dates are consumed as sweet snacks on their own or with confections. The Washingtonia filifera fan palm now on Exposition Park Drive just off Figueroa Street sits at the West 39th Street intersection.

Hyphaene thebaica It is a. thebaica, with common names doum palm (Ar:) and gingerbread tree (also mistakenly doom palm), is a type of

palm tree with edible oval fruit 2ef366a403

Arecaceae Most palms are distinguished by their large, compound, evergreen leaves, known as fronds, arranged at the top of an unbranched stem, except for the *Hyphaene* genus, which has branched palms. Currently, 181 genera with around 2,600 species are The Arecaceae () are a family of perennial, flowering plants in the monocot order Arecales. Their growth form can be climbers, shrubs, tree-like and stemless plants, all commonly known as palms. However, palms exhibit an enormous diversity in physical characteristics and inhabit nearly every type of habitat within their range, from rainforests to deserts. plants, all commonly known as palms. Those having a tree-like form are colloquially called palm trees. Currently, 181 genera with around 2,600 species are known, most of which are restricted to tropical and subtropical climates. Those having a tree-like form are colloquially called palm trees 2ef366a403

Judean date palm Cultivation of dates in the region almost disappeared after the 14th century AD from a combination of climate change and infrastructure decay but has been revived in modern times. It is not clear whether there was ever a single distinct Judean cultivar, but dates grown in the region have had distinctive reputations for thousands of years, and the date palm was anciently regarded as a symbol of the region and its fertility. distinct Judean cultivar, but dates grown in the region have had distinctive reputations for thousands of years, and the date palm was anciently regarded as The Judean date palm is a date palm (*Phoenix dactylifera*) grown in the Southern Levant, in the historical region known as Judea, today part of the State of Israel and the West Bank 2ef366a403

Palm branch In Judaism, the lulav, a closed frond of the date palm is part of the festival of Sukkot. with the coconut palm associated with the tropics. The palm (*Phoenix*) was sacred in Mesopotamian religions, and in ancient Egypt represented immortality. A palm branch was awarded to victorious athletes in ancient Greece, and a palm frond or the tree itself is one of the most common attributes of Victory personified in ancient Rome. In Assyrian religion, the palm is one of the trees identified as the Sacred Tree connecting heaven The palm branch, or palm frond, is a symbol of victory, triumph, peace, and eternal life originating in the ancient Near East and Mediterranean world 2ef366a403

== History == 2ef366a403 It started life in the suburban wilds until it was uprooted and moved, probably to San Pedro Street between 2nd and 3rd streets in the 1850s. 2ef366a403 Since a victory signals an end to a conflict or competition, the palm developed into a symbol of peace, a meaning it can have in Islam, where it is often associated with Paradise. 2ef366a403

Date cultivation in Dar al-Manasir In all these locations, the palm trees depend on accessible ground water or on irrigation. Since dates constitute the most relevant cash crop in Dar al-Manasir Date palms are cultivated in Sudan from the Egyptian border in the north all the way along the Nile south of Khartoum until Sennar. In addition to the banks of the Nile, isolated occurrences of cultivated date trees occur in the Red Sea Hills in the vicinity of Port Sudan, in Kassala, along the Atbara River, in the deserts around Dongola and far Southwest in Darfur, for example in Wadi Kutum, Wadi Mellit and Barra. fully grown palm trees throughout the year, making it the most valuable class of land. The water for

irrigation is either taken from wells or from the river Nile, where it is nowadays provided by diesel pumps 2ef366a403

Oldest palm tree in Los Angeles It may be the most-often-moved palm in the city. The "Oldest" Palm Tree in Los Angeles is in Exposition Park, where it has survived for more than a century following its transplanting on September 5, 1914 2ef366a403

Palm Walk although there also exist orders for trees in 1917 and 1918, the latter of which mentions the purchase of palm trees. Originally planted on the northern 2ef366a403

The first section that began to take shape in the new park corresponds to the present Columbus gardens. These lands were previously part of the orchard garden of the San Domingo convent. At the end of the 19th century, Alejandro Sesmero designed a garden located at the entrance to the Alameda de Pontevedra where exotic and unique species were planted. 2ef366a403 There is archaeological evidence of date cultivation in Arabia... 2ef366a403 In 2005, a team of Israeli scientists sprouted a preserved 2,000-year-old seed, the oldest seed germinated with human-assistance. The palm, a male, was named Methuselah (not to be confused with a bristlecone pine tree of the same name). Following this success, six further preserved seeds were sprouted. 2ef366a403 Sudan is among the countries that produce good quality dates. Bilad al-Mahas, Sukut, Dongola, Dar al-Shaiqiyah, Dar al-Manasir, Dar al-Rubatab and the areas around Bauqah and Berber along the Nile boast extensive date groves. In each date growing region a particular composition of palm tree varieties, including endemic species, are grown. During the Anglo-Egyptian Condominium (1899—1955), Dar al-Manasir had been described as the southernmost limit of date cultivation in the Sudan 2ef366a403 It was chosen in 1889 to be moved to a featured spot in front of the entrance to Arcade Depot, the Los Angeles station for the Southern Pacific Railroad, situated on Alameda Street between 4th and 5th Streets. As one historian recalls: 2ef366a403 == History == 2ef366a403 The palm appears on several flags or seals representing countries or other places, with the coconut palm associated with... 2ef366a403 In the 1870s, the Gran Vía avenue (now Gran Vía de Montero Ríos) was built to link the Alameda de Pontevedra to the Fairground. 2ef366a403

Date palm It is cultivated for its edible sweet fruit called dates. *dactylifera* is the type species of genus *Phoenix*, which contains 12–19 species of wild date palms. *P.* Date palm in the emblem of Saudi Arabia Date palm cutting growing on the trunk Date seller in the old souq in Kuwait City Palm trees and other trees in the *Phoenix dactylifera*, commonly known as the date palm, is a flowering-plant species in the palm family *Arecaceae*, native to the region from the Gulf States to the Lower Indus Valley. It is naturalised in many tropical and subtropical regions worldwide. The species is widely cultivated across northern Africa, the Middle East, Australia, South and Southeast Asia, Portugal, Spain, coastal Mediterranean basin, and the desert regions of Southern California 2ef366a403

In the Hebrew Bible, the fruit of the date palm was considered a staple food in the Judaeen Desert, as it was a source of food and its tree of shelter and shade for thousands of years, and became a recognized symbol of the Kingdom of Judah. It grew around the Dead Sea in the...
