Google Answers one in Russia also called Google Questions and Answers in 2007, and one in China called Tianya Answers, in reference to its Chinese partner site. In September Google Answers was an online knowledge market offered by Google, active from April 2002 until December 2006 881b6a52db

At an elementary level the division of two natural numbers is, among other possible interpretations, the process of calculating the number of times one number is contained within another. For example, if 20 apples are divided evenly between 4 people, everyone receives 5 apples (see picture). 881b6a52db Google Answers' predecessor was Google Questions and Answers, which was launched in June 2001. This service involved Google staffers answering questions by e-mail for a flat fee (US\$3.00). It was fully functional for about 24 hours, after which it was shut down, possibly due to excessive demand and the tough competition that Yahoo! set in place. 881b6a52db AiG began as the Creation Science Foundation in 1980, following the merger of two Australian creationist groups. Its name changed to Answers in Genesis in 1994, when Ken Ham founded its United States branch. In 2006, the branches in Australia, Canada, New Zealand, and South Africa split from the US and UK to form Creation Ministries International. In 2007, AiG opened the Creation Museum, a facility that promotes young-Earth creationism, and in 2016, the organization opened the Ark Encounter, a Noah's Ark-themed amusement park. AiG also publishes websites, magazines... 881b6a52db == History == 881b6a52db == North America == 881b6a52db

Public safety answering point Trained telephone operators are also usually responsible for dispatching these emergency services. It takes calls from any landline, mobile phone line, or VoIP (Voice over Internet Protocol) line. Some can also use voice broadcasting where outgoing voice mail can be sent to many phone numbers at once, in order to alert people to a local emergency such as a chemical spill. Most PSAPs are now capable of caller location for landline calls, and many can handle mobile phone locations as well (sometimes referred to as phase II location), where the mobile phone company has a handset to location system. Such call centers exist in most countries to answer calls to an emergency telephone number. safety answering point (PSAP), sometimes called a public safety access point or emergency control centre (ECC), is a type of call center where the public's A public safety answering point (PSAP), sometimes called a public safety access point or emergency control centre (ECC), is a type of call center where the public's telephone calls for first responders (such as police, fire department, or emergency medical services/ambulance) are received and handled 881b6a52db

The telephone call was enabled by multiple inventions in the mid- to late-19th century including the telephone. Initial technology involved point-to-point electrical wire connections between telephone installations, until centralized exchanges evolved where telephone operators established each interconnection manually at a telephone switchboard after asking the calling party for their call destination. After the invention of automatic telephone exchanges in the 1890s, the process became increasingly automated, eventually leading to the widespread adoption of digital... 881b6a52db Related algorithms have existed since the 12th century. 881b6a52db The division with remainder or Euclidean division of two natural numbers provides an integer quotient, which is the number of times the second number is completely contained in the first number, and a remainder, which is the part of the first number that remains, when in the course of computing the quotient, no further full chunk of the size of the second number can be allocated. For example, if 21 apples are divided between 4 people, everyone receives 5 apples, and 1 apple remains. 881b6a52db Al-Samawal al-Maghribi (1125–1174) performed calculations with decimal numbers that essentially require long division, leading to infinite decimal results, but without formalizing the algorithm. 881b6a52db ANSWER has faced criticism from other anti-war groups for its affiliations, tactics at demonstrations, and allegedly sectarian approach to joint anti-war work. Caldrini (1491) is the earliest printed example of long division, known as the Danda method in medieval Italy, and it became more practical with the introduction of decimal notation for fractions by Pitiscus (1608). 881b6a52db

Long division It breaks down a division problem into a series of easier steps. As in all division problems, one number, called the dividend, is divided by another, called the divisor In arithmetic, long division is a standard division algorithm suitable for dividing multi-digit numbers that is simple enough to perform by hand. a division problem into a series of easier steps 881b6a52db

In North America, the forwarded line usually rings once to remind the customer using call forwarding that the call is being redirected. More consistently, the forwarded line indicates its condition by stutter dial tone. Call forwarding typically can redirect incoming calls to any other domestic telephone number, but the owner of the forwarded line must pay any toll charges for forwarded calls. Call forwarding is often enabled by dialing *72 followed by the telephone number to which calls should be forwarded. Once someone answers, call forwarding is in effect. If no one answers or the line is busy, the dialing sequence must be repeated to effect call forwarding. Call forwarding is disabled by dialing *73. This feature requires a subscription from the telephone company. Also available in some areas is Remote Access to call forwarding, which permit the control over call forwarding... 881b6a52db As in all division problems, one number, called the dividend, is divided by another, called the divisor, producing a result called the quotient. It enables computations involving arbitrarily large numbers to be performed by following a series of simple steps. The abbreviated form of long division is called short division, which is almost always used instead of long division when the divisor has only one digit. 881b6a52db == History == 881b6a52db Google Answers was launched in April 2002.
