Cocaine The leaves are processed into cocaine paste, a crude mixture of coca alkaloids, from which cocaine base is isolated and then converted to cocaine hydrochloride. increased mucus production due to irritation and inflammation of the nasal passages. However, its high abuse potential, adverse effects, and cost have limited its medical use and led to its replacement by alternative medicines. Historically, cocaine was a standard topical medication used as a local anesthetic with intrinsic vasoconstrictor properties. Although total synthesis is possible, it is complex and not used for production. This irritation leads to symptoms such as a runny nose, nasal congestion Cocaine is a central nervous system (CNS) stimulant and tropane alkaloid, derived primarily from the leaves of two

Wikipedia:Language learning centre/Word list thesaurus these thesis thespian thespians theta they thick thicken thickened thickening thickens thicker thickest thicket thickets thickish thickly thickness Drawing up a comprehensive list of words in English is important as a reference when learning a language as it will show the equivalent words you need to learn in the other language to achieve fluency. You can use the list to generate your own lists in whatever language you're learning and to test yourself. Eventually these words will all be translated into big lists in many different languages and using the words in phrase contexts as a resource. A big list will constantly show you what words you don't know and what you need to work on and is useful for testing yourself 3ccee949d
