Scientific studies have concluded that the use of face masks is effective in protecting the individual using them against COVID-19. Various case-control and population-based studies have also shown that the increased use of masks in a community reduces the spread of SARS-CoV-2, although there is a paucity of evidence from randomized controlled trials (RCTs). Masks vary in their effectiveness. Fitted N95s outperform surgical masks, while cloth masks provide marginal protection. During the public health emergency, governments widely recommended (and, in some jurisdictions, mandated) the wearing of masks. Prominent national... ab77406e0e
