SMS language ". Additionally, SMS language made text messages Short Message Service (SMS) language or textese is the abbreviated language and slang commonly used in the late 1990s and early 2000s with mobile phone text messaging, and occasionally through Internet-based communication such as email and instant messaging. Many call the words used in texting "textisms" or "Internet slang. presses on a small keypad to generate each letter, and messages were generally limited to 160 bytes (or 1280 bits) caf62da53a

Text messages are used for personal, family, work, business, and social purposes. In the 21st century, the sending of short informal messages became mainstream

and an accepted part of many cultures, as happened... caf62da53a The term private message (PM) originated as a feature on internet forums, while the term direct message (DM) originated as a feature on Twitter. Due to the popularity of the latter service, DM has since been appropriated by other platforms, such as Instagram, and is often genericized in popular usage. caf62da53a There are two main types of private messages, and one obscure type: caf62da53a Originally, astronomers considered a GMT day to start at noon, while for almost everyone else it started at midnight. To avoid confusion, the name Universal Time was introduced in 1928 to denote GMT as counted from midnight. Today, Universal Time usually refers to... caf62da53a SMS language is similar to telegraphs' language where charges were by the word. It seeks to use the fewest letters to produce ultra-concise words and sentiments in dealing with the space, time, and cost constraints of text messaging. It follows from how early SMS permitted only 160 characters and that carriers began charging a small fee for each message sent (and sometimes received). Together with the difficulty and inefficiency... caf62da53a Research by the NHTSA suggests that, in the United States in 2021, at any given daylight moment, an estimated 660,000, out of almost 212 million licensed drivers, used their phones while driving. According to a report issued by the U.S. Department of

Transportation, drivers between the ages of 20 and 29 are the most likely to text while driving. In 2010 the International Telecommunication Union said that "texting, making calls, and other interaction with in-vehicle information and communication systems while driving is a serious source of driver distraction and increases the risk of traffic accidents". In 2022, 3,308 people were killed in motor vehicle crashes involving distracted drivers in the U.S. In... caf62da53a

Regression toward the mean To the extent this result is due to skill (the team is in good condition, with a top In statistics, regression toward the mean (also called regression to the mean, reversion to the mean, and reversion to mediocrity) is the phenomenon where if one sample of a random variable is extreme, the next sampling of the same random variable is likely to be closer to its mean. year, what does that mean for their chances for winning next season. Furthermore, when many random variables are sampled and the most extreme results are intentionally picked out, it refers to the fact that (in many cases) a second sampling of these picked-out variables will result in "less extreme" results, closer to the initial mean of all of the variables caf62da53a

SMS It uses standardized communication protocols that let mobile phones exchange short text messages, typically transmitted over cellular networks. It uses standardized communication Short Message Service (SMS) is a text messaging service component of most telephone, Internet and mobile device systems. Short Message Service (SMS) is a text messaging service component of most telephone, Internet and mobile device systems caf62da53a

Expectations for etiquette may differ depending on various factors. For example, expectations for appropriate behaviour have been found to differ markedly between the U.S. and India. Another example is generational differences. In The M-Factor:

How the Millennial Generation Is Rocking the Workplace, Lynne Lancaster and David Stillman note that younger Americans often do not consider it rude to...
caf62da53a Features of early mobile phone messaging encouraged users to use abbreviations. 2G technology made text entry difficult, requiring multiple key presses on a small keypad to generate each letter, and messages were generally limited to 160 bytes (or 1280 bits). Additionally, SMS language made text messages quicker to type, while also avoiding additional charges from mobile network providers for lengthy messages exceeding 160 characters. caf62da53a Because of Earth's uneven angular velocity in its elliptical orbit and its axial tilt, noon (12:00:00) GMT is rarely the exact moment the Sun crosses the Greenwich Meridian and reaches its highest point in the sky there. This event may occur up to 16 minutes before or after noon GMT, a discrepancy described by the equation of time. Noon GMT is the annual average (the arithmetic mean) moment of this event, which accounts for the word "mean" in "Greenwich Mean Time". caf62da53a

Texting while driving Texting while driving, also called texting and driving, is the act of composing, sending, or reading text messages on a mobile phone while operating a Texting while driving, also called texting and driving, is the act of

composing, sending, or reading text messages on a mobile phone while operating a motor vehicle. As a form of distracted driving, texting while driving significantly increases the chances that a driver will be involved in a motor vehicle accident. Texting while driving is considered extremely dangerous by many people, including authorities, and in some places has either been outlawed or restricted

Regression toward the mean is thus a useful concept to consider when designing any scientific experiment, data analysis, or test, which intentionally selects the most extreme events - it indicates that follow-up checks may be useful...
Standard functionality

Text messaging Text messages may be sent over a cellular network or may also be sent via satellite or Internet connection. Text messaging, or texting, is the act of composing and sending electronic messages, typically consisting of alphabetic and numeric characters, between two or more users of mobile phones, tablet computers, smartwatches, desktops/laptops, or another type of compatible computer

caf62da53a

According to the Introduction to the New Testament of The Message, its "contemporary idiom keeps the language of the Message (Bible) current and fresh and understandable". Peterson notes that in the course of the project, he realized this was exactly what he had been doing in his thirty-five years as a pastor, "always looking for an English way to make the biblical text relevant to the conditions of the people". caf62da53a A Catholic version, The Message – Catholic / Ecumenical Edition, was published in 2013. caf62da53a Developed as part of the GSM standards, and based on the SS7 signalling protocol, SMS rolled out on digital cellular networks starting in 1993 and was originally intended for customers to receive alerts from their carrier/operator. The service allows users to send and receive text messages of up to 160 characters, originally to and from GSM phones and later also CDMA and Digital AMPS; it has since been defined and supported on newer networks, including present-day 5G ones. Using SMS gateways, messages can be transmitted over the Internet through an SMSC, allowing communication to computers, fixed landlines, and satellite. MMS was later introduced as an upgrade to SMS with "picture messaging" capabilities. caf62da53a Mathematically, the

strength of this "regression" effect is dependent on whether or not all of the random variables are drawn from the same distribution, or if there are genuine differences in the underlying distributions for each random variable. In the first case, the "regression" effect is statistically likely to occur, but in the second case, it may occur less strongly or not at all. caf62da53a

Private message on an Internet forum). on an IM) or asynchronous (e. Unlike public posts, PMs are only viewable by the participants. g. g. networking, a private message (PM), or direct message (DM), refers to a private communication, often text-based, sent or received by a user of a private communication In computer networking, a private message (PM), or direct message (DM), refers to a private communication, often text-based, sent or received by a user of a private communication channel on any given platform. Long a function present on IRCs and Internet forums, private channels for PMs have also been prevalent features on instant messaging (IM) and on social media networks. It may be either synchronous (e caf62da53a

A typical text box is a rectangle, possibly with a border that separates the text box

from the rest of the interface. Text boxes may contain horizontal and vertical scrollbars. Text boxes usually display a text cursor (commonly a blinking vertical line), indicating the current region of text being edited. It is common for the mouse cursor to change its shape when it hovers over a text box.

caf62da53a == Prevalence == caf62da53a == History == caf62da53a

The term originally referred to messages sent using the Short Message Service (SMS) on mobile devices. It has grown beyond alphanumeric text to include multimedia messages using the Multimedia Messaging Service (MMS) and Rich Communication Services (RCS), which can contain digital images, videos, and sound content, as well as ideograms known as emoji (happy faces, sad faces, and other icons), and on various instant messaging apps. Text messaging has been an extremely popular medium of communication since the turn of the twenty-first century and has also influenced changes in society.
