

Stomach Pain And Diarrhea

Abdominal pain Given that, approaching the examination of a person and planning of a differential diagnosis is extremely important. Abdominal pain, also known as a stomach ache, is a symptom associated with both non-serious and serious medical issues. Since the abdomen contains most of the body's vital organs, it can be an indicator of a wide variety of diseases. Since the abdomen contains most Abdominal pain, also known as a stomach ache, is a symptom associated with both non-serious and serious medical issues 69acc535dc

Travelers' diarrhea About 12% of people may have symptoms for a week. Occasionally dysentery may occur. Most travelers recover within three to four days with little or no treatment. TD is defined as the passage of unformed stool (one or more by some definitions, three or more by others) while traveling. Travelers' diarrhea (TD) is a stomach and intestinal infection experienced during travel to a new location as a result of lack of immunity to local food-borne Travelers' diarrhea (TD) is a stomach and intestinal infection experienced during travel to a new location as a result of lack of immunity to local food-borne pathogens. It may be accompanied by abdominal cramps, nausea, fever, headache, and bloating 69acc535dc

Gastroenterocolitis Other symptoms may include:[citation needed] Abdominal pain or. the stomach, small intestines, and colon. The main symptom of gastroenteritis is diarrhea 69acc535dc

Gastroenteritis is usually caused by viruses; however, gut bacteria, parasites, and fungi can also cause gastroenteritis. In children, rotavirus is the most common cause of severe disease. In adults, norovirus

and *Campylobacter* are common causes. Eating improperly prepared food, drinking contaminated water, or having close contact with an infected person can spread the disease. Treatment is generally the same with or without a definitive diagnosis, so testing to confirm is usually not needed.

69acc535dc Many stomach diseases are associated with infections. In the past it was widely but incorrectly believed that the highly acidic environment of the stomach would keep the stomach immune from infection. Many studies have indicated that most cases of stomach ulcers, gastritis, and stomach cancer are caused... 69acc535dc

Stomach rumble Some examples of diseases that may be associated with this symptom include carcinoid neoplasm and coeliac sprue. A stomach rumble, also known as a bowel sound, peristaltic sound, abdominal sound, bubble gut or borborygmus (pronounced ; plural borborygmi), is a rumbling, growling or gurgling noise produced by movement of the contents of the gastrointestinal tract as they are propelled through the small intestine by a series of muscle contractions called peristalsis. abdominal pain, diarrhea or constipation. The lack of bowel sounds can occur with ileus, intestinal obstruction, or other pathologies, but there is no evidence that listening for their absence is useful for diagnosis. A trained healthcare provider can listen to these intestinal noises with a stethoscope, but they may be audible enough to be heard with the naked ear as the fluid and gas move forward in the intestines (in the vicinity of, but not actually within the stomach) 69acc535dc

function are the most common side effects. resulting in cellular death 69acc535dc

Common causes of pain in the abdomen include gastroenteritis and irritable bowel syndrome. About 15% of people have a more serious underlying condition such as appendicitis, leaking or ruptured abdominal aortic aneurysm, diverticulitis, or ectopic pregnancy. In a third of cases, the exact cause is unclear. 69acc535dc Recommendations for prevention include eating only properly cleaned and cooked food, drinking bottled water, and frequent hand washing. The oral cholera vaccine... 69acc535dc Bacteria are responsible for more than half of cases, typically via foodborne illness and waterborne diseases. The bacteria enterotoxigenic Escherichia coli (ETEC) are typically the most common except in Southeast Asia, where Campylobacter is more prominent. About 10 to 20 percent of cases are due to norovirus. Protozoa such as Giardia may cause longer-term disease. The risk is greatest in the first two weeks of travel and among young adults. People affected are more often from the developed world. 69acc535dc

Stomach disease In the stomach there is a slight balance between acid and the wall lining which is protected by Stomach diseases include gastritis, gastroparesis, Crohn's disease (rarely), and various cancers. nausea, vomiting, bloating, cramps, diarrhea and pain 69acc535dc

The scientific name borborygmus is related to the 16th-century French word borborygme, itself from Latin, ultimately from Ancient Greek βορβορυγμός (borborygmós). The Greek term is probably onomatopoeic in origin. 69acc535dc For young children in impoverished countries, prevention includes hand washing with soap, drinking clean water, breastfeeding babies instead of using formula, and proper disposal of human waste. The rotavirus vaccine is recommended as a prevention for children. Treatment involves getting enough... 69acc535dc == Etymology == 69acc535dc

Gastroenteritis Symptoms may include diarrhea, vomiting, and abdominal Gastroenteritis, also known

Stomach Pain And Diarrhea

as infectious diarrhea, is an inflammation of the gastrointestinal tract including the stomach and intestine. Fever, lack of energy, and dehydration may also occur. infectious diarrhea, is an inflammation of the gastrointestinal tract including the stomach and intestine. Symptoms may include diarrhea, vomiting, and abdominal pain. Although it is not related to influenza, in Canada and the United States it is often referred to as "stomach flu". This typically lasts less than two weeks

Wilderness-acquired diarrhea Potential sources are. Wilderness-acquired diarrhea is a variety of traveler's diarrhea in which backpackers and other outdoor enthusiasts are affected

The stomach is an important organ in the body. It plays a vital role in digestion of foods, releases various enzymes and also protects the lower intestine from harmful organisms. The stomach connects to the esophagus above and to the small intestine below. It is intricately related to the pancreas, spleen and liver. The stomach does vary in size but its J shape is constant. The stomach lies in the upper part of the abdomen just below the left rib cage. The term gastropathy means "stomach disease" and is included in the name of the diseases portal hypertensive gastropathy, hyperplastic hypersecretory gastropathy (Ménétrier's disease), and others. However, not all stomach diseases are labeled with the word "gastropathy"; examples include peptic ulcer disease, gastroparesis, and dyspepsia.
