

How To Create The Ender Portal

Portal is a first person game. It consists primarily of a series of puzzles that must be solved by teleporting the player's character and simple objects using the "Aperture Science Handheld Portal Device", also referred to as the "portal gun", a device that can create portals between locations in the puzzles. The player character, Chell, is challenged and taunted by an artificial intelligence construct named GLaDOS (Genetic Lifeform and Disk Operating System) to complete each puzzle in the Aperture Science Enrichment Center using the portal gun with the promise of receiving cake when all the puzzles are completed. The Source engine's physics system allows kinetic energy to be retained through portals, requiring creative use of portals to maneuver through the test chambers. This gameplay element is based on a similar concept from the game Narbacular Drop; many of the team members from the DigiPen Institute... cbfa3b4f81 Like the original Portal (2007), players solve puzzles by placing portals and teleporting between them. In the single-player campaign, players control Chell, who navigates the dilapidated Aperture Science Enrichment Center during its reconstruction by the supercomputer GLaDOS (Ellen McLain); new characters include robot Wheatley (Stephen Merchant) and Aperture founder Cave Johnson (J. K. Simmons). In the new cooperative mode, players solve puzzles together as robots Atlas and P-Body (both voiced by Dee Bradley Baker). Jonathan Coulton and the National produced songs for the game. cbfa3b4f81 The plot of Beyond the Dark Portal takes place after the events of Warcraft II: Tides of Darkness. The Alliance itself had been splintered after the Second War and Gilneas and Stromgarde had withdrawn their support. The arch-mage Khadgar summoned heroes of Azeroth, Alleria, Danath Trollbane, Turalyon and Kurdran Wildhammer to rally the forces of the Alliance. The Horde... cbfa3b4f81
