2021 Facebook leak in policy-violating content on the platform, while Donald Trump's Facebook account had been whitelisted in the company's XCheck program. Another of the In 2021, an internal document leak from Facebook (now Meta Platforms, or Meta) showed it was aware of harmful societal effects from its platforms, yet persisted in prioritizing profit over addressing these harms. The leak, released by whistleblower Frances Haugen, resulted in reporting from The Wall Street Journal in September, as The Facebook Files series from journalist Jeff Horwitz, as well as the Facebook Papers, by a consortium of news outlets the next months

YouTube and Blogger maintain separate accounts for users who registered with the services before the Google acquisition. However, effective April 2011 YouTube users are required to link to a separate Google Account if they wish to continue to log into that service. Furthermore, Facebook was fully aware that harmful content was being pushed through Facebook algorithms reaching young users. The types of content included posts promoting anorexia nervosa and self-harm photos.

Google Account It is also often used as A Google Account is a

user account that is required for access, authentication and authorization to certain online Google services. It is also often used as single sign-on for third party services. Google Account is a user account that is required for access, authentication and authorization to certain online Google services

Many countries have banned or temporarily limited access to Facebook. Use of the website has also been restricted in various ways in other countries. As of 2024, the only countries to continually ban access to the social networking site are: China, Iran, North Korea, Myanmar, Russia, Turkmenistan and Uganda. However, since most North Korean residents have no access to the Internet, China, Russia, and Iran are the only countries where access to Facebook is actively restricted in a wholesale manner, although it is possible to access the site through onion services.

Use of social network websites in investigations
Altinger's e-mail and Facebook accounts, changing
Altinger's Facebook status and e-mailing
Altinger's contacts stating that he met a girl online and was planning Social network services are increasingly being used in legal and criminal investigations. In some situations, content posted on Myspace has been used in court to determine an appropriate sentence based on a defendant's attitude. Information posted on sites such as Twitter, Instagram, and Facebook has been used by police and university officials to prosecute users of said sites

Privacy concerns with Facebook Facebook was also criticized for allowing the 2012 Barack Facebook and other services by Meta Platforms (doing business as Meta) have faced a number of privacy concerns. In addition, employers and other organizations/individuals have been known to use Meta for their own purposes. In response to these growing privacy concerns, some pressure groups and government agencies have increasingly asserted the users' right to privacy and to be able to control their personal data. Meta has also been a part of many data breaches that have occurred within the company. These stem partly from the company's revenue model that involves selling information collected about its users for many things including advertisement targeting. As a result, individuals' identities and private information have sometimes been compromised without their permission. These issues and others are further described including user data concerns, vulnerabilities in the company's platform, investigations by pressure groups and government agencies, and even issues with students. Acton, announced that they were deleting their Facebook accounts, using the hashtag "#deletefacebook" 6d835caece

Censorship of Facebook Use of the website has also Facebook is a social networking service that has been gradually replacing traditional media channels since 2010. Facebook can simultaneously propagate fake news, hate speech, and misinformation, thereby undermining the credibility of online platforms and social media. Because the site indiscriminately displays material publicly posted by users, Facebook can, in effect, threaten oppressive governments. Many countries have banned or temporarily limited access to Facebook. undermining the credibility of online platforms and social media. Facebook has limited moderation of the content posted to its site 6d835caece

== Usage == 6d835caece Founded by Mark Zuckerberg and his college roommates Eduardo Saverin, Andrew McCollum, Dustin Moskovitz, and Chris Hughes at Harvard University, it was initially limited to Harvard students. It expanded to other colleges in the Boston area, the Ivy League, and gradually most universities in the United States and Canada, corporations, and by 2006 to everyone with a valid email address along with an age requirement of being 13 or older. Facebook introduced key features like the News Feed in 2006, which became central to user engagement. By 2007, Facebook surpassed MySpace in global traffic and became the world's most popular social media platform. The company focused on generating revenue through targeted advertising based on user data, a model that drove its rapid financial growth. In 2012, Facebook went public with one of the largest IPOs in tech history. Acquisitions played a significant role in Facebook's dominance. In 2012, it purchased Instagram,

followed by WhatsApp and Oculus VR in 2014, extending...
Third-party service providers may implement service authentication for Google Account holders via the Google Account mechanism. The service was initially targeted to Harvard students only before gradually expanding to other universities in North America. Since 2006, Facebook has permitted registration by individuals aged 13 and older, with the exception of South Korea, Spain, and Quebec, where the minimum age is 14. As of December 2023, Facebook reported approximately 3.07 billion monthly active users worldwide. As of July 2025, it was ranked as the third-most-visited website in the world, with 23 percent of its traffic originating from the United States. It was the most downloaded mobile application of the 2010s. Facebook can be accessed from devices with Internet connectivity, such as personal computers, tablets and smartphones. After registering, users can create a profile revealing personal information about themselves. They...
