

Chewing Gum With Xylitol

The Orbit brand was reintroduced 30 years later in 1976, when it was introduced in Germany, Switzerland and The Netherlands. This marked the first time that a sugar-free gum was marketed under the Wrigley name. The brand was later introduced in many other countries around the world. In the US, Orbit launched in 1977 but ran into trouble because of its xylitol... e2851f8371 In modern chewing gum, if natural rubber such as chicle is used, it must pass several purity and cleanliness tests. However, most modern types of chewing gum use synthetic gum-based materials and chemicals such as sugar and artificial flavoring chemicals. These materials allow for longer lasting flavor, a softer texture, and a reduction in tackiness. Polyol and Xylitol are two carbohydrate sugars that are used in the production of bubble gum and chewing gum. Rubbers are one additive that are in both bubble gum and chewing gum; however, the components of the rubber in the bubble gum are larger in mass than in chewing gum. e2851f8371 In 1975 Jenkki introduced the first chewing gum in the world that included xylitol. Xylitol gum was invented in Turku, Finland. The xylitol was originally derived from birch trees. Nowadays Jenkki xylitol gum is available in numerous different flavours, including peppermint, spearmint, eucalyptus, lemon, tutti frutti, strawberry and salmiakki. e2851f8371 == History == e2851f8371 The Orbit name in chewing gums dates back to the early 20th century. It was made as Orbit Listerated Gum, by the Common Sense Co. (later known as Listerated Gum Corp.). The Orbit trademark went to Wrigley when it bought Listerated Gum Corp in 1925. e2851f8371 == History == e2851f8371 Emil Fischer, a German chemist, and his assistant Rudolf Stahel isolated a new compound from beech wood chips in September 1890 and named it Xylit, after the... e2851f8371

PÜR Gum The PUR Company Inc. In recent years, The PUR Company expanded its product line to include mints. and founded in 2010 by Jay Klein in Toronto, Ontario, Canada. Smint The name is a portmanteau of "sugarfree" and "mint", not of "small mint" as is commonly thought. 45 (1 Suppl 1): Smint is a brand of sugar-free breath mints owned by the Italian-Dutch company Perfetti Van Melle. "Smint Mint". International Dental Journal. Retrieved 22 January 2019. Tanzer JM (1995). Smint. It is known for its distinctive packaging that dispenses one mint at a time, and for their Reuleaux triangle shape. "Xylitol chewing gum and dental caries" e2851f8371

Chewing gum Chewing gum is a soft, cohesive substance designed to be chewed without being swallowed. Its texture is reminiscent of rubber because of the physical-chemical properties of its polymer, plasticizer, and resin components, which contribute to its elastic-plastic, sticky, chewy characteristics. Modern chewing gum is composed of gum base, sweeteners, softeners/plasticizers Chewing gum is a soft, cohesive substance designed to be chewed without being swallowed. Modern chewing gum is composed of gum base, sweeteners, softeners/plasticizers, flavors, colors, and, typically, a hard or powdered polyol coating e2851f8371

By 2001, Smint was the top-selling mint in its class in 90% of the markets where it was available, and in the same year Smint started a partnership with Breast Cancer Care, donating 5p to the charity for every pack of strawberry Smint sold. e2851f8371 Trident is sold in more than 70 countries around the world, but sometimes marketed under different names. The gum is called Stimorol across much of Europe and Africa, Beldent in Argentina, First in Turkey, Dirol in Russia, and Hollywood in France. e2851f8371

Xylitol Two other isomeric sugar alcohols exist. 2025. Of the common sugar alcohols, only sorbitol is more soluble in water. Xylitol is used as a sugar substitute in such manufactured products as drugs, dietary supplements, confections, toothpaste, and chewing gum, but Xylitol is an organic compound with the formula HOCH(CH(OH)CH₂OH)₂. It is

classified as a polyalcohol and a sugar alcohol, specifically an alditol. It is a colorless or white crystalline solid e2851f8371

== History == e2851f8371 == 0-9 == e2851f8371 Smint was first conceived by Chupa Chups in 1990 as a sugar-free product targeted at adult consumers. After four years of development, Smint was introduced to the market as a subsidiary brand, and launched in the UK a year later in 1995. In 1996 Smint started their "No Smint, no kiss" campaign, aiming to make the brand name "smint" synonymous with "kissing breath". e2851f8371 American Chicle Company introduced sugar-free Trident gum in 1960. Two years later, the business was purchased by Warner-Lambert. e2851f8371

Lotte Wellfood , Ltd. Currently, it is the third-largest chewing gum manufacturer in the world, and its plants are located in Kazakhstan, Pakistan, Belgium, India, Russia, Myanmar, and China. The company was established in 1967. Because xylitol, unlike other sweeteners, did not produce acid when chewed, the company was able to promote its chewing gum Lotte Wellfood Co. a xylitol-based chewing gum. (Korean: 롯데웰푸드), formerly Lotte Confectionery, is a South Korean international confectionery company headquartered in Seoul, South Korea. Lotte Confectionery was renamed Lotte Wellfood in 2023, after being merged with Lotte Foods in 2022 e2851f8371

Xylitol is used as a food additive and sugar substitute. Its European Union code number is E967. Replacing sugar with xylitol in food products may promote better dental health, but evidence is lacking on whether xylitol itself prevents dental cavities. In the United States, xylitol is used as a common sugar substitute, and is considered to be safe for humans. e2851f8371

List of chewing gum brands This list contains both chewing gum and bubblegum. Modern chewing gum was originally This is a list of chewing gum brands in the world. list of chewing gum brands in the world. Most chewing gums are considered polymers. Chewing gum is a type of gum made for chewing, and dates back at least 5,000 years. Chewing gum is a type of gum made for chewing, and dates back at least 5,000 years. Modern chewing gum was originally made of chicle, a natural latex. By the 1960s, chicle was replaced by butadiene-based synthetic rubber which is cheaper to manufacture e2851f8371
