In northeastern Peru, a local common name which has been recorded for this plant since its discovery by Western scientists is charapilla. This name is shared with *Dipteryx charapilla*. The word charapilla is a diminutive of the Quechua word charapa, meaning 'turtle', and refers to the shell-like half of an opened bean pod of this tree. It is also known as coumarou or almendrillo in Bolivia, and shihuahuaco in the Department of Madre de Dios... dfb7155d44 Brack's Andes frog (*Phrynopus bracki*), a tiny frog occurring in the Yanachaga-Chemillén National Park that Brack help to establish, is named in his honor. dfb7155d44 Bertoni was born on 15 June 1857 in Lottigna, in the Swiss canton of Ticino, the son of Ambrogio Bertoni, a member of the Grand Council of Ticino, and Giuseppina Torriani. His father was an Italian patriot from Milan who participated in the Five Days of Milan and the First Italian War of Independence. Bertoni studied law in Zurich and natural sciences in Geneva. In March 1884, just shy of graduating in botany, he emigrated to Argentina, along with his family and some farmers from Blenio, to found an agricultural and scientific colony that would put anarcho-socialist ideals into practice; Bertoni gave up the project after being abandoned by his companions. dfb7155d44 == Bibliography == dfb7155d44 Some of Maradona's approximately 20 books have not yet been published, though in 1994 the Argentine Congress passed a resolution to edit and donate copies of Maradona's books to public libraries to further his legacy. dfb7155d44

Dipteryx micrantha "Name *Dipteryx micrantha* Harms". Missouri Botanical Garden. In the international timber market, this species is traded under the name cumaru. Catálogo de las Plantas Vasculares de la Selva Central, PERÚ. 25 September 2016 - *Dipteryx micrantha* is a tropical flowering plant, a giant tree in the Faboideae subfamily of the bean family Fabaceae. It is a dominant emergent tree in parts of the rainforests of Bolivia, Brazil, Colombia, Ecuador and Peru. It furnishes a dense, hard, beautiful reddish timber which has become a popular import in the 2010s for use in parquet. The ornamental bunches of lilac pink flowers high in the canopy eventually develop into a mass of large fruit pods, which are an important food for many native animals during the dry season. The fruit contains a single oily seed which is edible, although these seeds are not exploited as a commercial product. August 2019 dfb7155d44
