Music publishers of sheet music and recordings. Music is often characterized as a highly versatile medium for expressing human creativity. Technology facilitating the recording and reproduction of music has historically included sheet music, microphones Music is the arrangement of sound to create some combination of form, harmony, melody, rhythm, or otherwise expressive content. Music may be performed using a wide variety of musical instruments, including the human voice. It can also be composed, sequenced, or otherwise produced to be indirectly played mechanically or electronically, such as via a music box, barrel organ, or digital audio workstation software on a computer. While scholars agree that music is defined by a small number of specific elements, there is no consensus as to what these necessary elements are. Music is generally agreed to be a cultural universal that is present in all human societies. Diverse activities are involved in the creation of music, and are often divided into categories of composition, improvisation, and performance. Definitions of music vary widely in substance and approach 9ca2feb656

While Édouard-Léon Scott de Martinville was the first ever person to record sound, the music of prehistoric cultures is first firmly dated to c. 38,000 BC of the Upper Paleolithic by evidence of bone flutes, though it remains unclear whether or not the actual origins lie in the earlier Middle Paleolithic period (300,000 to 50,000 BP). There is little known about prehistoric music, with traces mainly limited to some simple flutes and percussion instruments. However, such evidence indicates that music existed to some extent in prehistoric societies such as...
