

Who Is The Father Of Computer Science

History of computer science Developments in previous centuries alluded to the discipline that we now know as computer science. Developments The history of computer science began long before the modern discipline of computer science, usually appearing in forms like mathematics or physics. The history of computer science began long before the modern discipline of computer science, usually appearing in forms like mathematics or physics. This progression, from mechanical inventions and mathematical theories towards modern computer concepts and machines, led to the development of a major academic field, massive technological advancement across the Western world, and the basis of massive worldwide trade and culture 4b63402447

Father A father, dad, or daddy, is the male parent of a child. Besides the paternal bonds of a father to his child or children, fathers may have a parental, legal A father, dad, or daddy, is the male parent of a child. Besides the paternal bonds of a father to his child or children, fathers may have a parental, legal, and social relationship with their child or children that carries with it certain rights and obligations 4b63402447

John McCarthy (computer scientist) He co-authored the proposal for the Dartmouth workshop which coined the term "artificial intelligence" (AI), led the development of the symbolic programming language family Lisp and had a large influence in the language ALGOL, popularized time-sharing, and created garbage collection. He was one of the founders of the discipline of artificial intelligence, and part of just a small group of artificial intelligence researchers in the 1950s and 1960s. an American computer scientist and cognitive scientist. He was one of the founders of the discipline of artificial intelligence, and part of just a small John McCarthy (September 4, 1927 – October 24, 2011) was an American computer scientist and cognitive scientist 4b63402447

A stepfather is a non-biological male parent married to a child's parent and forms a family unit but generally does not have the legal rights and responsibilities of a parent in relation to the child. An adoptive father is a man who has become the child's parent through the legal process of adoption. 4b63402447 The name of institute is chosen to commemorate and pay tribute to one of the most honorable and prominent Muslim mathematician, thinker, and scholar Muḥammad ibn Mūsā al-Khwārizmī who was born in Persia and lived from 780 AD to 850 AD. Al-Khwārizmī's contribution in the field of mathematics, astronomy and geography drastically changed the paradigm of science and mathematics. He was the first one to introduce Algebra and is known as Father of Algebra. In fact, even the word "algorithm" is formed by tampering his name "Al-Khawarizmi". His mathematical concepts form the basis of the digital computer models introduced by Alan Turing and John... 4b63402447 == Pioneers == 4b63402447

Computer engineering Computer engineering may be referred to as Electrical and Computer Engineering Computer engineering (CE, CoE, CpE, or CompE) is a branch of engineering specialized in developing computer hardware and software. fields of electrical engineering, electronics engineering and computer science 4b63402447

It integrates several fields of electrical engineering, electronics engineering and computer science. Computer engineering may be referred to as Electrical and Computer Engineering or Computer Science and Engineering at some universities. 4b63402447 Early computers were meant to be used only for calculations... 4b63402447 John McCarthy was born in Boston, Massachusetts, on September 4, 1927, to an Irish immigrant father and a Lithuanian Jewish immigrant mother, John Patrick and Ida (Glatt) McCarthy. The family was obliged to relocate frequently during the Great Depression, until McCarthy's father found work as an organizer for the Amalgamated Clothing Workers in Los Angeles, California... 4b63402447 == Early history == 4b63402447 == Academic disciplines == 4b63402447

List of people considered father or mother of a field However, certain individuals are remembered for making significant contributions to the birth or development of a field or technology. These individuals may often be described as the "father" or "mother" of a particular field or invention. List of inventors List of pioneers in computer science Founders of statistics Father of the House Father (honorific) According to some definitions of "video Often, discoveries and innovations are the work of multiple people, resulting from continual improvements over time 4b63402447

Computer earned the semiofficial title of 'inventor of the modern computer'[who. "Who is the Father of the Computer. The term computer system may refer to a nominally complete computer that includes the hardware, operating system, software, and peripheral equipment needed and used for full operation, or to a group of computers that are linked and function together, such as a computer network or computer cluster. ComputerHope. Archived from the original A computer is a machine that can be programmed to automatically carry out sequences of arithmetic or logical operations (computation). ". Modern digital electronic computers can perform generic sets of operations known as programs, which enable computers to perform a wide range of tasks.] 4b63402447

McCarthy spent most of his career at Stanford University. He received many accolades and honors, such as the 1971 Turing Award for his contributions to the topic of AI, the United States National Medal of Science, and the Kyoto Prize. 4b63402447 == Early life and education == 4b63402447

Seymour Cray Computer Engineering Award Cray was an American electrical engineer and supercomputer architect who designed a series of computers that were the fastest in the world for decades, and founded Cray

Research which built many of these machines. Called "the father of supercomputing," Cray has been credited with creating the supercomputer industry. , and an early pioneer of supercomputing. He played a key role in the invention and design of the UNIVAC 1103, a landmark high-speed computer and the first computer available for commercial use. List of computer science awards List of prizes named after people IEEE John von Neumann Medal Gordon Bell Prize "Obituary Seymour Cray, Father of supercomputing" - The Seymour Cray Computer Engineering Award, also known as the Seymour Cray Award, is an award given by the IEEE Computer Society, to recognize significant and innovative contributions in the field of high-performance computing. The award honors scientists who exhibit the creativity demonstrated by Seymour Cray, founder of Cray Research, Inc 4b63402447

In 1972 the IEEE presented Cray with the Harry H. Goode Memorial Award for his contributions to large-scale computer design and the development of multiprocessing systems. One year after Cray's death in 1996, IEEE created the Seymour Cray Computer Engineering Award in honor of his creative spirit. The award is one of the 12 technical awards sponsored... 4b63402447 Numbering only a few in the 1930s, today computers are ubiquitous over a broad range of industrial and consumer products that use computers as control systems. The price, size, and complexity of computers can range from simple single-purpose devices like key fobs, microwave ovens, and remote controls up to supercomputers and factories using industrial robots. Computers are at the core of general-purpose devices such as personal computers and mobile devices, such as smartphones. Computers power the Internet, which links billions of computers and users. 4b63402447 The adjective "paternal" refers to a father and comparatively to "maternal" for a mother. The verb "to father" means to procreate or to sire a child from which also derives the noun "fathering". Biological fathers determine the sex of their child through a sperm cell which either... 4b63402447 Algorithms and data structures are central to computer science. The theory of computation concerns abstract models of computation and general classes of problems that can be solved using them. The fields of cryptography and computer security involve studying the means for secure communication and preventing security vulnerabilities. Computer graphics and computational geometry address the generation of images. Programming language theory considers different ways to describe computational processes, and database theory concerns the management of repositories of data. Human-computer interaction investigates the interfaces through which humans and computers interact, and software engineering focuses on the design and principles behind developing software. Areas such as operating systems, networks and embedded systems investigate... 4b63402447

Al-Khawarizmi Institute of Computer Science It has gathered many competent and highly accomplished researchers from various institutes of Pakistan. Al-Khawarizmi Institute of Computer Science, (دانش كد[] الخوارزمى برائ[]) was established in August 2002 at University of Engineering and Technology Al-Khawarizmi Institute of Computer Science, (دانش كد[] الخوارزمى برائ[] كمپيوٹر سائنس) was established in August 2002 at University of Engineering and Technology, Lahore to promote research and development in various fields of Computer Science and Information Technology. It was built to conduct applied research in collaboration with various academic and industrial institutes to promote technology and development at national and international level 4b63402447

Computer science Included broadly in the sciences, computer science spans Computer science is the study of computation, information, and automation. Included broadly in the sciences, computer science spans theoretical disciplines (such as algorithms, theory of computation, and information theory) to applied disciplines (including the design and implementation of hardware and software). An expert in the field is known as a computer scientist. areas of computer science Computer science is the study of computation, information, and automation 4b63402447

List of pioneers in computer science pioneers in computer science List of people considered father or mother of a field § Computing The Man Who Invented the Computer (2010 book) List of Russian This is a list of people who made transformative breakthroughs in the creation, development and imagining of what computers could do 4b63402447

A biological father is the male genetic contributor to the creation of the child, through sexual intercourse or sperm donation. A biological father may have legal obligations to a child not raised by him, such as an obligation of monetary support. A putative father is a man whose biological relationship to a child is alleged but has not been established. 4b63402447
